## **Math Talks For Undergraduates:**

**Math Talks for Undergraduates** Serge Lang, 2012-12-06 For many years Serge Lang has given talks to undergraduates on selected items in mathematics which could be extracted at a level understandable by students who have had calculus. Written in a conversational tone, Lang now presents a collection of those talks as a book. The talks could be given by faculty, but even better, they may be given by students in seminars run by the students themselves. Undergraduates and even some high school students will enjoy the talks which cover prime numbers, the abc conjecture, approximation theorems of analysis, Bruhat-Tits spaces, harmonic and symmetric polynomials, and more, in a lively and informal style. **Classroom Discussions**

Suzanne H. Chapin, Mary Catherine O'Connor, Nancy Canavan Anderson, 2009 Based on a four-year research project funded by the U.S. Department of Education, this book is divided into four sections: Talk in the Mathematics Class introducing five discussion strategies or moves that help teachers achieve their instructional goal of strengthening students' mathematical thinking and learning; What Do We Talk About? Implementing Talk in the Classroom; and Case Studies. **Digging Deeper** Ruth Parker, Cathy Humphreys, 2018 Sense making makes mathematics personal, and when it's personal, it comes to life. And that's how Number Talks can really make a difference. Ruth Parker and Cathy Humphreys show how teachers react to wrong answers and mistakes, making all the difference in mathematics class. The response can determine whether a student tunes out or delves in. In this comprehensive sequel to *Making Number Talks Matter*, Ruth Parker and Cathy Humphreys explore more deeply the ways Number Talks can transform student understanding of mathematics. Through vignettes and videos, you'll meet teachers who are learning to listen closely to students and prompting them to figure things out for themselves. You'll learn how they make on-the-spot decisions, continually advancing and deepening the conversation. Personal and accessible, this book highlights the kinds of questions that elicit deeper thinking. Ways to navigate tricky, problematic, or just plain hard exchanges in the classroom. How to more effectively use wait time during Number Talks. The importance of creating a safe learning environment. How to nudge students to think more flexibly without directing their thinking. This book offers a rich assortment of ideas to help make Number Talks even more vibrant and meaningful for you and your students.

**Mathematical Discourse: Let the Kids Talk!** Barbara Blanke, 2019-12-10 This invaluable resource provides teachers with the tools they need to facilitate mathematical discourse and create opportunities for students to think constructively, communicate effectively, and increase mathematics proficiency. This book will help teachers develop a new set of pedagogical skills and strategies to assess, plan, and organize their classrooms in a manner that is conducive to mathematical discourse. With helpful tips and strategies that are easy to implement, this standards-based book supports an equitable learning environment by encouraging active listening, clear communication, justification of perspective, and acknowledgement of students' experiences. Each chapter includes Culturally and Linguistically Responsive Teaching and Learning strategies to address cultural norms for diverse populations and support the needs of English language learners.
