Hydroponic Gardening tips and tricks Elisabeth ahmadi, 2020-04-13 Use These Hydroponic Gardening Tips And Tricks to build your own Garden efficiently This book contains proven steps and strategies on how to grow your own healthy vegetables and fruits There are few things more fulfilling than eating food you have grown and yet each year many people miss this opportunity simply because they don t have suitable soil or land to grow their own produce However there are ways of getting over this hurdle thanks to a system of gardening which does not require the use of soil A hydroponic system is one such system Hydroponics refers to a form of gardening that does not use soil Instead of growing your crops in soil you grow them in a solution made of nutrients and water Think about it plants just like human beings need nutrients in order to grow Soil houses such nutrients This is why we plant our crops in soil But as you know not all soil is created equal Some types of soil are deficient in nutrients and this result in poor yields In addition as stated before many people do not have access to land in the first place This puts them at a disadvantage when it comes to growing their crops Some amazing benefits of hydroponic gardening include Faster plant growth Plants grown in a hydroponic system tend to grow at least 20 percent faster than those grown in soil Better yields You can expect 20 to 25 percent more yield when you adopt hydroponic gardening Less water Less water is needed simply because hydroponic systems are enclosed and thus the plants get the water they need instead of such water being distributed to the surrounding environment Less space Because the plants have easier access to nutrients when they are grown in a hydroponic system they do not need to grow deep roots or spread them widely in search of nutrients Thus you will be able to grow your plants more closely and thus grow more plants in a smaller space More freedom to grow your crops The best thing about hydroponic gardening is that it gives more

people the opportunity to grow plants regardless of where they live You can easily grow crops indoors even if you live in an apartment No need of soil With hydroponic gardening you don't use soil Instead you use what is known as grow medium to house or hold the plants This is less messy and easier to control than soil Before you can enjoy the above amazing benefits of opting for hydroponics to grow fruits and vegetables you will first need to learn how to grow plants using this step The first thing you need to do is to select a hydroponic system that will allow you to comfortably grow your vegetables and fruits Here is A Preview Of What You Will Learn What is Hydroponic Gardening Which hydroponic system should I use Which medium should I choose What about hydroponic nutrients and pH Choose a Light Source And Much Much More Take Action Now And Get This Kindle Book For ONLY 0.99
