Sugimoto, 2016-02-22 Scientometrics have become an essential element in the practice and evaluation of science and research including both the evaluation of individuals and national assessment exercises. Yet researchers and practitioners in this field have lacked clear theories to guide their work. As early as 1981, then doctoral student Blaise Cronin published The need for a theory of citing, a call to arms for the fledgling scientometric community to produce foundational theories upon which the work of the field could be based. More than three decades later, the time has come to reach out the field again and ask how they have responded to this call. This book compiles the foundational theories that guide informetrics and scholarly communication research. It is a much needed compilation by leading scholars in the field that gathers together the theories that guide our understanding of authorship, citing, and impact. **Click, Swipe, Learn: Skills for the Digital World (A True Book: Our Digital World)**

Cody Crane, 2025-09-02 How can kids use the internet smartly? Discover it with this step-by-step guide for young readers. Kids spend about five hours a day connecting with digital content, consuming it and/or creating it. Some of that content might include misinformation and altered images. It may even promote biases or dangerous ideas. Creating content includes pitfalls too, from copyright infringement to posting information that could be harmful or damaging. That's why digital literacy is so important. Click, Swipe, Learn: Skills for the Digital World uses engaging, interactive text, including critical thinking questions, to show kids exactly what they need to watch out for as they navigate the digital world.

ABOUT THIS SERIES The world of media and technology is changing fast, and young students are right there in the thick of it. As children try to make sense of new technologies, they face a variety of critical issues, including how to access reliable sources of information, how to protect themselves online, and how to use technology in mindful and respectful ways. That's where the books in the Our Digital Future series can help. Each title has been developed to help young readers think critically and navigate new technologies with confidence and care. **Mastery**

Tony Wagner, Ulrik Juul Christensen, 2025-09-16 If you've ever wondered why our education system feels stuck in the past, this book delivers both a powerful critique and a bold vision for the future. Daniel H. Pink, 1 New York Times bestselling author of Drive: How much information is forgotten almost immediately after it is taught? How many students graduate from high school unprepared for careers where lifelong learning is essential to succeed? These problems stem from an educational system that uses time spent in a classroom and the results of standardized multiple choice tests as proxies for actual understanding. Educators Tony Wagner and Ulrik Juul Christensen call for a radical new system of learning where students progress individually when they demonstrate that they can use what they have learned, no matter how long it takes to get there. This is called mastery learning, and it is the future of education. This book shows how mastery learning is already being put to use in the United States and around the world from

kindergarten to college and in the workplace Through conversations with teachers students parents policymakers and employers Wagner and Christensen show how mastery improves motivation and prepares students for productive work an engaged civic life and personal growth and well being They also outline the challenges of adopting mastery learning and how to overcome them Mastery is an urgent call to action to transform education for all *Digital Literacy* Susan

Curriculum and Learning for Climate Action, 2021-11-01

Listen to the podcast. The world is on a track to true climate catastrophe with unprecedented heat, floods, wildfires, and storms setting new records almost weekly. To avoid a climate disaster, we need rapid, transformative, and sustained action as well as a major shift in our thinking, a shift strong enough to make the climate crisis a center of our social, political, economic, personal, and educational life. Curriculum and Learning for Climate Action is one of the best scorecards in comparative education for keeping track of this drama as it unfolds, shedding light on the global climate crisis like no other education writing today. This book turns to our curricula, our education systems, and our communities for a response on how to effectively achieve Target 4.7 of the UN Sustainable Development Goals: SDGs Universal Education for Sustainable Development, ESD, and Global Citizenship Education. GCED. The message from key stakeholders, including students, educators, and leaders of civil society, is driven home with passion and uncommon clarity. We can and must stave off the worst of climate change by building climate action into the world's pandemic recovery.
