Ngos In Cities:

The Urban Opportunity Nicolas Hall, Robert Hart, Diana Mitlin, 1996 This study describes how its contributors Northern NGOs working in the South are responding to the urban opportunity building partnerships to support local organizations that are tackling urban problems and bringing local views to bear on officials who may have the power to improve things

NGOs in Cities Leo Thomas, 1995-01 The work of intermediary NGOs in urban areas is attracting increasing attention in the development community Policy documents from Northern NGOs official agencies and southern governments are acknowledging the potential contributions that NGOs could make to development in cities However whilst ascribing numerous roles to urban NGOs few commentators have reflected on the appropriateness or capacity of urban NGOs to assume expanded and mainstreamed roles

Aid from International NGOs Dirk-Jan Koch, 2009-02-03 International NGOs are increasingly important players within the new aid architecture but their geographic choices remain uncharted territory This book focuses on patterns of development assistance mapping while analysing and assessing the country choices of the largest international NGOs Koch's approach is interdisciplinary and uses qualitative quantitative and experimental methods to provide a clear insight in the determinants of country choices of international NGOs The book aims to discover the country choices of international NGOs how they are determined and how they could be improved This work which uses a dataset created specifically for the research comes to the conclusion that international NGOs do not target the poorest and most difficult countries They are shown to be focussing mostly on those countries where their back donors are active Additionally it was discovered that they tend to cluster their activities for example international NGOs also have their donor darlings and their donor orphans Their clustering is explained by adapting theories that explain concentration in for profit actors to the non profit context The book is the first on the geographic choices of international NGOs and is therefore of considerable academic interest especially for those focusing on development aid and third sector research Furthermore the book provides specific policy suggestions for more thought out geographic decisions of international NGOs and their back donors

Funding Civil Society Lisa McIntosh Sundstrom, 2006 This book investigates the impact of Western democracy assistance programs on the development of Russian women's and soldiers rights NGOs in Russia It argues that the normative content of assistance programs as well as the character of regional political environments fundamentally shape the influence of such programs

The Role of Cities in International Relations Szpak, Agnieszka, Gawłowski, Robert, Modrzyńska, Joanna, Modrzyński, Paweł, Dahl, Michał, 2022-09-13 Concerns about the position and function of nation states in the international arena have led to a growing interest in the role of cities in international relations This timely book advances the argument that cities are becoming active and informal actors in international law making indicating the emergence of a third generation of multi level governance

Assessment of Non-governmental Organizations in the Philippines Antonio B. Quizon, Rhoda U. Reyes, 1989 *Cities in a Global Society* Richard Victor Knight, Gary Gappert, 1989-08 *Cities in a Global Society* is an impressive collection of essays focused on an important global redefinition. *Go Global* is a rapidly emerging theme of the 1990s and this book is the definitive overview of cities that are doing so. Michael Marien, Editor, *Future Survey*. This is one of the most significant public policy books to appear. In essay after essay this important volume makes clear a simple idea: That the culture, environment and economy of cities are increasingly influenced by forces well beyond the end of Main Street. *Bulletin of Municipal Foreign Policy* As the year 2000 approaches urbanized areas are entering a new era one in which they will be shaped primarily by their responses to powerful global forces. The editors and contributors to this fascinating and timely volume believe that cities must begin to assess their roles in a global society and establish their strategic position and comparative advantage in the global marketplace. A wide range of essays by noted international scholars shows how national urban policies tend to be reactive, driven by problems rather than by opportunities, consequently reinforcing the passive nature of cities and their dependency on national initiatives. The diversity of their perspectives, analyses, observations and insights helps to identify and define critical issues that cities are beginning to address as they become more internationally oriented. After first examining the role of cities in society the contributors present several perspectives on a city futures management model and review strategies for developing global cities. This stimulating volume offers a wide range of innovative responses to these new challenges and will be useful to professionals and students in urban studies, economics, development studies, anthropology, international relations, future studies, political science, political theory and sociology.
