-2023- HOW TO PLANT A -2023- RAISED GARDEN BED

1. First, create a well-draining raised garden bed. This is a bed that is built up on a base of soil, and it is designed to hold soil and water. It is a great way to grow plants that need a lot of water, like tomatoes and peppers.
2. Next, you'll want to add a layer of mulch to the bed. This will help to keep the soil moist and warm, and it will also help to suppress weeds.
3. Then, you'll want to add a layer of compost to the bed. This will help to improve the soil and provide your plants with the nutrients they need to grow.
4. Now, you can start planting your plants. Make sure to space them out properly, and water them regularly.
5. As your plants grow, you'll want to keep them well-watered. This is especially important during the summer months when the weather is hot and dry.
6. Finally, when your plants are ready to harvest, you can start picking them. Enjoy your fresh produce!
