## **Moonlight Blue Earth:**

**On the Trail to Moonlight Gulch** Shelter Somerset, 2012-04-13 It's 1886 and Chicago is booming but for nineteen year old Torsten Pilkvist American born son of Swedish immigrants it's not big enough. After tragically losing a rare love Tory immerses himself in the pages of a Wild West mail order bride magazine where he stumbles on the advertisement of frontiersman and Civil War veteran Franklin Ausmus Torsten and Franklin begin an innocent correspondence or as innocent as it can be considering Torsten keeps his true gender hidden. But when his parents discover the letters Tory is forced out on his own. With nowhere else to go he boards a train for the Black Hills and Franklin's homestead Moonlight Gulch. Franklin figures Tory for a drifter but he's lonely after ten years of living in the backcountry alone and his girl in Chicago has mysteriously stopped writing so he hires Tory on as his ranch hand. Franklin and Tory grow closer while defending the land from outlaws who want the untapped gold in Franklin's creek but then Franklin learns Tory's true identity and banishes Tory from his sight. Will their lives be forever tattered or will Torsten overhearing a desperate last ditch scheme to snatch Franklin's gold be able to save Moonlight Gulch and his final shot at love? *Little rivers* Henry Van Dyke, 1895

**Alien Earths** Dr. Lisa Kaltenegger, 2024-04-16 Kaltenegger's breezy narrative style invites you to experience with her the challenges and joys of being a scientist on the frontier of discovery. Neil deGrasse Tyson Astrophysicist American Museum of Natural History Horizon expanding Kaltenegger has something of Sagan's knack for eliciting wonder. The Times A superb testament to the scientific virtue of curious wonder. Wall Street Journal For thousands of years humans have wondered whether we're alone in the cosmos. Now for the first time we have the technology to investigate. But once you look for life elsewhere you realize it is not so simple. How do you find it over cosmic distances? What actually is life? As founding director of Cornell University's Carl Sagan Institute astrophysicist Lisa Kaltenegger has built a team of tenacious scientists from many disciplines to create a specialized toolkit to find life on faraway worlds. In Alien Earths she demonstrates how we can use our homeworld as a Rosetta Stone creatively analyzing Earth's history and its astonishing biosphere to inform this search. With infectious enthusiasm she takes us on an eye opening journey to the most unusual exoplanets that have shaken our worldview: planets covered in oceans of lava, lonely wanderers lost in space and others with more than one sun in their sky. And the best contenders for Alien Earths. We also see the imagined worlds of science fiction and how close they come to reality. With the James Webb Space Telescope and Dr Kaltenegger's pioneering work she shows that we live in an incredible new epoch of exploration. As our witty and knowledgeable tour guide Dr Kaltenegger shows how we discover not merely new continents like the explorers of old but whole new worlds circling other stars and how we could spot life there. Worlds from where aliens may even be gazing back at us. What if we're not alone? *Light and Color in the Outdoors* Marcel Minnaert, 2012-12-06 All

of science springs from the observation of nature In this classic book the late Marcel Minnaert accompanies the reader on a tour of nature's light and color and reveals the myriad phenomena that may be observed outdoors with no more than a pair of sharp eyes and an enquiring mind From the intriguing shape of the dapples beneath a tree on a sunny day to rainbows mirages and haloes to the colors of liquid ice and the sky to the appearance of the sun moon planets and stars Minnaert describes and explains them all in clear language accessible to the layman This volume includes 80 new photographs over half in color illustrating many of the phenomena ordinary and exotic discussed in the book Most of the new photos are by Pekka Parviainen the renowned Finnish nature photographer
