## **Moral Dealing:**

Moral Dealing David Gauthier, 2019-05-15 David Gauthier is one of the most outstanding and influential philosophers working in moral theory today and his book *Morals by Agreement* 1986 has established him as a preeminent defender of contractarian moral theory This volume brings together a selection of his best essays on contractarianism many of which have become difficult to find

**The Moral Wager** Malcolm Murray, 2007-05-05 In the following chapters I offer an evolutionary account of morality and from that extrapolate a version of contractarianism I call consent theory Game theory helps to highlight the evolution of morality as a resolution of interpersonal conflicts under strategic negotiation It is this emphasis on strategic negotiation that underwrites the idea of consent Consent theory differs from other contractarian models by abandoning reliance on rational self interest in favour of evolutionary adaptation From this more emphasis will be placed on consent as natural convergence rather than consent as an idealization My picture of contractarianism then ends up looking more like the relativist model offered by Harman rather than the rational or pseudo rational model offered by Gauthier let alone the Kantian brands of Rawls or Scanlon So at least some of my discussion will dwell on why it is no loss to abandon hope for the universal categorical morality that rational models promise In the introduction I offer the betting analogy that underwrites the remaining picture There are some bets where the expected utility is positive though the odds of winning on this particular occasion are exceedingly low In such cases we cannot hope to give an argument that taking the bet is rational The only thing we can say is that those predisposed to take this kind of bet on these kinds of occasions will do better than those with other dispositions so long as such games occur often enough

**Legal Symbolism** Jiří Přibáň, 2016-04-22 Jir Prib n s book contributes to the field of systems theory of law in the context of European legal and political integration and constitution making It puts recent European legislative efforts and policies especially the EU enlargement process in the context of legal theory and philosophy Furthermore the author shows that the system of positive law has a symbolic meaning reflecting how it also contributes to the semantics of political identity democratic power and moral values as well as the complex relations between law politics and morality

**Liberty, Games and Contracts** Malcolm Murray, 2016-05-06 Jan Narveson is one of the most significant contemporary defenders of the libertarian political position Unlike other libertarians who typically defend their view with reference to natural rights or an appeal to utilitarianism Narveson s main contribution has been to offer a philosophical defence of libertarianism based on a Hobbesian individualist contractarian ethic Critiques of Narveson s contractarian libertarianism fall into three categories those that reject contractarian moral theory those that reject any link between contractarianism and libertarianism and those that accuse libertarians of conflating liberty with property In this book Malcolm Murray brings together the most significant of Narveson s critics and presents their work alongside replies by Jan Narveson

**Morals and Consent** Malcolm Murray, 2017-09-27 An evolutionary defence of contractarian ethics as applied to social norms

Howard Sobel, 1994-04-29 J Howard Sobel has long been recognized as an important figure in philosophical discussions of rational decision. He has done much to help formulate the concept of causal decision theory. In this volume of essays Sobel explores the Bayesian idea that rational actions maximize expected values where an action's expected value is a weighted average of its agent's values for its possible total outcomes. Newcomb's Problem and The Prisoner's Dilemma are discussed and Allais type puzzles are viewed from the perspective of causal world Bayesianism. The author establishes principles for distinguishing options in decision problems and studies ways in which perfectly rational causal maximizers can be capable of resolute choices. Sobel also views critically Gauthier's revisionist ideas about maximizing rationality. This collection will be a desideratum for anyone working in the field of rational choice theory whether in philosophy, economics, political science, psychology or statistics. Howard Sobel's work in decision theory is certainly among the most important, interesting and challenging that is being done by philosophers.
