Moral Education George B. Emerson,2015-07-11 Excerpt from *Moral Education A Lecture Delivered at New Bedford August 16 1842 Before the American Institute of Instruction* To come forward to point out the fearful mistake we have made and to presume to show how it may be corrected should need I am aware an apology While there is a class of men whose high office it is to educate our moral and spiritual powers to reinstate conscience on its throne and show us how all else should be brought into subjection to it it would have been much more fit that one of this class should now occupy this palace and teach us this lesson and I cannot but feel how much more reverently on such a subject you would have listened to his voice But they have done their part of the work The great truths have been clearly declared The high principles have been eloquently laid down An humbler but not less essential part is ours not to reason out new truths not to bring new illustrations but to draw conclusions which may be applicable to the daily duties of our life and faithfully wisely and courageously to apply them In treating this subject we shall first endeavor to ascertain what is to be done What is the moral education at which we should aim In the second place What have we to act upon And lastly How shall we effect our purpose About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

Moral Education George Barrell Emerson,1842 *Ethical Education in American Public Schools* Waldo Beach,1992 The intent of this book is to analyze the moral and social problems that currently plague U S schools The volume outlines what can be done to confront the problems of student behavior in and outside the classroom Illegal drug use theft and deceit

sexual practices and race relations are among the troubling issues facing educators Religious conservatives seek to preserve the religious and moral traditions of the past for they see the abandonment of these values as the source of current problems An entirely different approach to moral education is advanced by professional theorists of education and child psychologists Two specific programs of this group are values clarification and the cognitive development theories of Lawrence Kohlberg This book argues that a better approach to moral education is to seek a middle path between the two approaches This strategy for ethical instruction is described for both the visible curriculum and the hidden curriculum Moral education may occur in the prescribed curriculum in such areas as health sciences and hygiene social studies and literature and the arts Attention to the hidden curriculum involves developing a proper moral climate in the schools How the curriculum is taught is as important as What is taught A 36 item selected bibliography is included DB *Race-ing Moral Formation* Vanessa Siddle Walker, John R. Snarey, 2004 In this volume the editors incorporate the experiences of African Americans into the discourse on moral development theory and moral education By citing historical developments from the days of slavery to the present the authors provide a framework through which one can interpret the way morality has been cultivated amongst Black minorities Presenting intriguing essays of well known African American scholars the editors discuss both the psychology of moral formation among African American children adolescents and adults and the practical implications of this knowledge
