Bull,2010-02-25 A companion volume to *Moral Judgement from Childhood to Adolescence* specially written for teachers and students of education This volume includes analysis of the broad stages in the developmental pattern of the key variables that must shape it and of their function in moral judgement and of the principles that must lie behind a moral education that has autonomy as its goal The book concludes with practical proposals for a sequential pattern of moral learning and the methods of approach appropriate to it *Foundations of Moral Education* ,1983-12-02 Product information not available

Handbook of Moral and Character Education Larry Nucci,Tobias Krettenauer,2014-04-24 There is widespread agreement that schools should contribute to the moral development and character formation of their students In fact 80% of US states currently have mandates regarding character education However the pervasiveness of the support for moral and character education masks a high degree of controversy surrounding its meaning and methods The purpose of this handbook

is to supplant the prevalent ideological rhetoric of the field with a comprehensive research oriented volume that both describes the extensive changes that have occurred over the last fifteen years and points forward to the future Now in its second edition this book includes the latest applications of developmental and cognitive psychology to moral and character education from preschool to college settings and much more Moral Development in the Professions James R. Rest, Darcia Narvaez, 1994-11-01 Every year in this country some 10 000 college and university courses are taught in applied ethics And many professional organizations now have their own codes of ethics Yet social science has had little impact upon applied ethics This book promises to change that trend by illustrating how social science can make a contribution to applied ethics The text reports psychological studies relevant to applied ethics for many professionals including accountants college students and teachers counselors dentists doctors journalists nurses school teachers athletes and veterinarians Each chapter begins with the research base of the cognitive developmental approach especially linked to Kohlberg and Rest's Defining Issues Test Finally the book summarizes recent research on the following issues moral judgment scores within and between professions pre and post test evaluations of ethics education programs moral judgment and moral behavior models of professional ethics education and models for developing new assessment tools Researchers in different professional fields investigate different questions develop different research strategies and report different findings Typically researchers of one professional field are not aware of research in other fields An important aim of the present book is to bring this diverse research together so that cross fertilization can occur and ideas from one field can transfer to another
