Morality And Agency:

The Biology and Psychology of Moral Agency William Andrew Rottschaefer, 1998 Brings findings and theories in biology and psychology to bear on ethics *Common Ground, Common Future* Charles Garofalo, Dean Geuras, 2005-07-25 Common Ground Common Future Moral Agency in Public Administration Professions and Citizenship examines the public and private roles of the citizen as a moral agent The authors define this agent as a person who recognizes morality as a motive for action and not only follows moral principles but also acknowledges morality as his or her principle

Unprincipled Virtue Nomy Arpaly, 2003 Conventional thinking about the mind dating back to Aristotle envisions the emotions as being directed and determined by rational thought The author argues that the conventional picture of rationality is fundamentally false and has little to do with how real human beings actually behave Rational Choice and Moral Agency David Schmidtz, 1995-01 Is it rational to be moral How do rationality and morality fit together with being human These questions are at the heart of David Schmidtz's exploration of the connections between rationality and morality This inquiry leads into both metaethics and rational choice theory as Schmidtz develops conceptions of what it is to be moral and what it is to be rational He defends a fairly expansive conception of rational choice considering how ends as well as means can be rationally chosen and explaining the role of self imposed constraints in a rational life plan His moral theory is dualistic ranging over social structure as well as personal conduct and building both individual and collective rationality into its rules of recognition for morals To the why be moral question Schmidtz responds that being moral is rational but he does not assume we have reasons to be rational Instead Schmidtz argues that being moral is rational in a particular way and that beings like us in situations like ours have reasons to be rational in just that way This approach allows him to identify decisive reasons to be moral at the same time it explains why immorality is as prevalent as it is This book thus offers a set of interesting and realistic conclusions about how morality fits into the lives of humanly rational agents operating in an institutional context like our own **The Fallacy of Corporate Moral Agency** David Rønnegard, 2015-05-12 It is uncontroversial that corporations are legal agents that can be held legally responsible but can corporations also be moral agents that are morally responsible Part one of this book explicates the most prominent theories of corporate moral agency and provides a detailed debunking of why corporate moral agency is a fallacy This implies that talk of corporate moral responsibilities beyond the mere metaphorical is essentially meaningless Part two takes the fallacy of corporate moral agency as its premise and spells out its implications It shows how prominent normative theories within Corporate Social Responsibility such as Stakeholder Theory and Social Contract Theory rest on an implicit assumption of corporate moral agency In this metaphysical respect such theories are untenable In order to provide a more robust metaphysical foundation for corporations the book explicates the development of the corporate legal form in the US and UK which displays how the corporation has come to have its current legal attributes This historical evolution shows that the corporation is a legal fiction

created by the state in order to serve both public and private goals The normative implication for corporate accountability is that citizens of democratic states ought to primarily make calls for legal enactments in order to hold the corporate legal instruments accountable to their preferences

The Sources of Moral Agency John Deigh, 1996-07-13 These essays are concerned with the psychology of moral agency focusing on moral feelings and moral motivation

Dimensions of Moral Agency David Boersema, 2014-11-10 Dimensions of Moral Agency addresses and exemplifies the multi dimensionality of modern moral philosophy The book is a collection of papers originally presented at the Northwest Philosophy Conference in October 2013 The papers encompass a wide variety of topics within moral philosophy including metaethics normative ethics and applied ethics and broadly fall within the areas of the nature of moral agency and moral agency as it is played out in particular aspects of people's lived experiences The papers include assessments of the contributions of historical figures such as Aristotle Epictetus Confucius Berkeley and Descartes as well as analyses of agency as it relates to individual and social moral issues like mental illness the ethics of debt prostitution eco consumerism oppression and species egalitarianism among others Also covered are concerns related to the nature of moral reasoning at the individual and social level the relevance of love and emotion to moral agency and moral responsibility and efficacy Interwoven with these topics and issues are concerns related to what sorts of things are or could be moral agents and what constitutes a moral good the possibility of the existence of moral knowledge or moral facts or moral truth and what constitutes moral motivation and how that is or is not related to questions of moral justification

Rational Choice and Moral Agency David Schmidtz, 2016-05-17 Why be moral Philosophers have wanted to answer this question for well over two thousand years ever since Plato wrote on the subject The question turned out to be as frustrating as it is compelling A proper philosophical answer begins by saying what morality is and what it means to be moral A wise philosophical answer also steps back to ask what sort of being wants an answer Why are we asking Who wants to know What do we want and in what way might being moral serve our purposes What difference does it make whether we have any reason to be moral Do we have reason to care whether other people have any reason to be moral Why In this book David Schmidtz presents elements of a theory of humanly rational choice why we have reason to be rational why being rational about the big picture seldom involves maximizing our payoff on a day to day basis how rational agents choose ends and why rational agents choose to respect and care about other people Schmidtz also presents elements of a theory of morality how being moral connects to what is good for oneself and to what is good for others how it connects to following rules and understanding what the people around us expect from us and how it connects to the heights of human aspiration and flourishing

Erotic Morality Linda Holler, 2002 This work examines the role of the senses and emotions especially touch in moral reflection and agency It proposes that ethics consider touch as the centre of moral life rather than disciplines designed to control the body and feelings

Moral Agency and the Politics of Responsibility Cornelia Ulbert, Peter Finkenbusch, Elena Sondermann, Tobias Debiel, 2017-11-13 At a time when globalization has side lined many of

the traditional state based addressees of legal accountability it is not clear yet how blame is allocated and contested in the new highly differentiated multi actor governance arrangements of the global economy and world society

Moral Agency and the Politics of Responsibility investigates how actors in complex governance arrangements assign responsibilities to order the world and negotiate who is responsible for what and how The book asks how moral duties can be defined beyond the territorial and legal confines of the nation state and how obligations and accountability mechanisms for a post national world in which responsibility remains vague ambiguous and contested can be established Using an empirical as well as a theoretical perspective the book explores ontological framings of complexity emphasizing emergence and non linearity which challenge classic liberal notions of responsibility and moral agency based on the autonomous subject

Moral Agency and the Politics of Responsibility is perfect for scholars from International Relations Politics Philosophy and Political Economy with an interest in the topical and increasingly popular topics of moral agency and complexity The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY ND 4.0 license

Agency and Responsibility Jeanette Kennett, 2003 Is it ever possible for people to act freely and intentionally against their better judgement Is it ever possible to act in opposition to one's strongest desire If either of these questions are answered in the negative the common sense distinctions between recklessness weakness of will and compulsion collapse This would threaten our ordinary notion of self control and undermine our practice of holding each other responsible for moral failure So a clear and plausible account of how weakness of will and self control are possible is of great practical significance Taking the problem of weakness of will as her starting point Jeanette Kennett builds an admirably comprehensive and integrated account of moral agency which gives a central place to the capacity for self control Her account of the exercise and limits of self control vindicates the common sense distinction between weakness of will and compulsion and so underwrites our ordinary allocations of moral responsibility She addresses with clarity and insight a range of important topics in moral psychology such as the nature of valuing and desiring conceptions of virtue moral conflict and the varieties of recklessness here characterised as culpable bad judgement and does so in terms which make their relations to each other and to the challenges of real life obvious

Agency and Responsibility concludes by testing the accounts developed of self control moral failure and moral responsibility against the hard cases provided by acts of extreme evil

Social Theorists of Morality Owen Abbott, 2025-01-29 This book provides an interdisciplinary series of essays on key social theorists of morality It explores contributions to social moral theorising made by W E B Du Bois G H Mead Jane Addams Alasdair MacIntyre Carol Gilligan Seyla Benhabib Kwame Anthony Appiah and Jonathan Haidt It thus seeks to integrate alternative voices at the foundations of sociological theorising about morality while entering into dialogues with post Enlightenment moral philosophy and contemporary moral psychology In so doing it engages with perspectives of pragmatism virtue ethics care ethics feminist critiques and moral foundations theory The essays discuss key topics in social

theories of morality including moral action socialisation habit and reflexiveness relationships emotion self identity racism and colonialism universalism and innateness It centres crucial but often overlooked questions of moral power and assesses the relationship between moral theorising and normative argument The essays are conjoined by a running theme of moral agency how it is constituted and how it is enacted which orientates the book's arguments and critiques *Agency, Freedom, and Moral Responsibility* Andrei Buckareff, Carlos Moya, Sergi Rosell, 2014-01-14 This collection consists of original contributions that represent the state of the art of philosophical research on agency free will and moral responsibility It should be of interest to both specialists and students with research interests in the philosophy of action and moral psychology

Redescribing Moral Agency in Sirach, 4QInstruction, and the Hodayot World Kim, 2025-05-15 This book presents the first comprehensive comparison of how moral agency is constructed in Sirach 4QInstruction and the Hodayot World Kim argues that recent scholastic studies have overemphasized differences amongst various Second Temple texts and neglected the similarities between them By employing four stages of comparison description juxtaposition re description and rectification Kim re describes moral agency in Sirach 4QInstruction and the Hodayot and aims to rectify the relationship between these texts Kim demonstrates that moral agency cannot be described by categories such as affirmation or denial and argues that such agency should instead be described in terms of degrees and shaped by various factors such as knowledge and desire that will either decrease or increase moral agency Through an extensive comparison of these texts Kim concludes that the degree to which one internalizes and actualizes the teachings of their religious text increases one's capacity for moral agency and that this agency must be conceived as dynamic rather than static **Moral Psychology and Human Agency** Justin

D'Arms, Daniel Jacobson, 2014-11-06 These ten original essays examine the moral and philosophical implications of developments in the science of ethics the growing movement that seeks to use recent empirical findings to answer long standing ethical questions Efforts to make moral psychology a thoroughly empirical discipline have divided philosophers along methodological fault lines isolating discussions that will profit more from intellectual exchange This volume takes an even handed approach including essays from advocates of empirical ethics as well as those who are sceptical of some of its central claims Some of these essays make novel use of empirical findings to develop philosophical research programs regarding such crucial moral phenomena as desire emotion and memory Others bring new critical scrutiny to bear on some of the most influential proposals of the empirical ethics movement including the claim that evolution undermines moral realism the effort to recruit a dual process model of the mind to support consequentialism against other moral theories and the claim that ordinary evaluative judgments are seldom if ever sensitive to reasons because moral reasoning is merely the post hoc rationalization of unthinking emotional response **Virtue, Nature, and Moral Agency in the Xunzi** T. C.

Kline, P. J. Ivanhoe, 2000-01-01 Xunzi is traditionally identified as the third philosopher in the Confucian tradition after Confucius and Mencius Unlike the work of his two predecessors he wrote complete essays in which he defends his own

interpretation of the Confucian position and attacks the positions of others Within the early Chinese tradition Xunzi's writings are arguably the most sophisticated and philosophically developed This richness of philosophical content has led to a lively discussion of his philosophy among contemporary scholars This volume collects some of the most accessible and important contemporary essays on the thought of Xunzi with an Introduction that provides historical background philosophical context and relates each of the selections to Xunzi's philosophy as a whole and to the themes of virtue nature and moral agency These themes are also discussed in relation to Western philosophical concerns Forms of Fellow Feeling Neil Roughley, Thomas Schramme, 2018-01-25 What is the basis of our capacity to act morally This is a question that has been discussed for millennia with philosophical debate typically distinguishing two sources of morality reason and sentiment This collection aims to shed light on whether the human capacity to feel for others really is central for morality and if so in what way To tackle these questions the authors discuss how fellow feeling is to be understood its structure content and empirical conditions Also discussed are the exact roles that relevant psychological features specifically empathy sympathy and concern may play within morality The collection is unique in bringing together the key participants in the various discussions of the relation of fellow feeling to moral norms moral concepts and moral agency By integrating conceptually sophisticated and empirically informed perspectives Forms of Fellow Feeling will appeal to readers from philosophy psychology sociology and cultural studies **Shakespeare and Moral Agency** Michael D. Bristol, 2011-11-03 Shakespeare and Moral Agency presents a collection of new essays by literary scholars and philosophers considering character and action in Shakespeare's plays as heuristic models for the exploration of some salient problems in the field of moral inquiry Together they offer a unified presentation of an emerging orientation in Shakespeare studies drawing on recent work in ethics philosophy of mind and analytic aesthetics to construct a powerful framework for the critical analysis of Shakespeare's works Contributors suggest new possibilities for the interpretation of Shakespearean drama by engaging with the rich body of contemporary work in the field of moral philosophy offering significant insights for literary criticism for pedagogy and also for theatrical performance **Character Trouble** John Michael Doris, 2022 John M Doris has been a leading proponent of interdisciplinary approaches to moral psychology for decades His work has transformed the way in which philosophers approach questions of character virtue and agency This selection of his work focuses on the ways in which human personality orders or fails to order moral cognition and behaviour Christianity and Morality Henry Wace, 1877
