*Explaining European Identity Formation* Stephanie Bergbauer,2017-10-24 What makes people

identify with Europe To answer this question this book analyzes the development and determinants of a common European identity among EU citizens from the Maastricht Treaty in 1992 to the recent financial and economic crisis The author examines citizens identification with Europe for all EU member states and systematically explores the theoretical and empirical implications of two turning points in the recent history of EU integration namely the EU s enlargement to Central and Eastern Europe in 2004 2007 and the financial and economic crisis that started in 2008 The book integrates theoretical approaches to European identity in sociology social psychology and EU public opinion research in a comprehensive model for explaining individual identification with Europe The empirical analysis employs a multilevel framework to systematically assess the influence of individual characteristics and the political economic and social context on citizens feelings of identity The long analysis period spanning from 1992 to the present allows inferences to be drawn about the long term developments in the sources of European identification as well as the immediate impact of EU enlargement and the crisis on the determinants of European identification

*European Research Reloaded: Cooperation and Integration among Europeanized*

*States* Ronald Holzhacker,Markus Haverland,2006-09-01 The Three Waves of European Research European cooperation and integration has continued to progress forward over the past five decades with an ever deepening impact on the member states The first wave of research into these processes concerned European integration the process of institution building and policy developments at the European Union EU level The second wave on Europeanization used integration as an explanatory factor in understanding domestic political change and continuity related to the EU What is now necessary is to link our understanding of these bottom up and top down processes of integration and Europeanization in the EU This book argues

that a third wave of research on the EU is needed to adequately understand the increased interconnectedness between the European and national political levels We posit that this third wave should be sensitive to the temporal dimension of European integration and Europeanization In particular we seek to link the processes of European integration and Europeanization in a new way by asking the question how has Europeanization affected current modes of integration and cooperation in the EU Part I Europeanization of the Member States Preparing the ground for the third wave the first part of the book concerns Europeanization In order to fully understand the feedback of Europeanization on cooperation and integration it is important to analyze how European integration has had an impact on member states in the first place in particular indirectly beyond the direct mechanism of compliance with European policies **Spain** Richard Gillespie, Richard Youngs, 2013-09-27 This volume assesses the evolution of Spain's external relations during the 1990s within and beyond Europe and assesses the principal challenges facing the country at the beginning of the twenty first century The coincidence of several crucial global and European developments has had a profound effect on Spain Adjustment of the economy and changes in foreign policy perspectives have become unavoidable In turn Spain as an increasingly self confident member of the EU has itself become a significant actor in European level developments Spain's relationship with Europe and the wider world is increasingly balanced between new constraints and new opportunities for international influence **Introduction to the Literature of Europe in the Fifteenth, Sixteenth, and Seventeenth Centuries** Henry Hallam, 1880 **Modern Europe**
