**Overcentralization in economic administration** Janos Kornai, 1959      *The Contradictions of "Real Socialism"*  
Michael A. Lebowitz, 2012-08-01 What was real socialism the term which originated in twentieth century socialist societies for the purpose of distinguishing them from abstract theoretical socialism In this volume Michael A Lebowitz considers the nature tendencies and contradictions of those societies Beginning with the constant presence of shortages within real socialism Lebowitz searches for the inner relations which generate these patterns He finds these in particular in what he calls vanguard relations of production a relation which takes the apparent form of a social contract where workers obtain benefits not available to their counterparts in capitalism but lack the power to decide within the workplace and society While these societies were able to claim major achievements in areas from health care to education to popular culture the separation of thinking and doing prevented workers from developing their capacities as fully developed human beings The relationship within real socialism between the vanguard as conductor and a conducted working class however did not only

lead to the deformation of workers and those elements necessary for the building of socialism it also created the conditions in which enterprise managers emerged as an incipient capitalist class which was an immediate source of the crises of real socialism As he argued in The Socialist Alternative Real Human Development Lebowitz stresses the necessity to go beyond the hierarchy inherent in the relation of conductor and conducted and beyond the vanguard Marxism which supports this to create the conditions in which people can transform themselves through their conscious cooperation and practice i e a society of free and associated producers A History of Modern Political Thought in East Central Europe Balázs

Trencsényi, Michal Kopeček, Luka Lisjak Gabrijelčič, Maria Falina, Mónika Baár, Maciej Janowski, 2018-10-18 A History of Modern Political Thought in East Central Europe is a synthetic work authored by an international team of researchers covering twenty national cultures and 250 years It goes beyond the conventional nation centered narratives and presents a novel vision especially sensitive to the cross cultural entanglement of political ideas and discourses Its principal aim is to make these cultures available for the global market of ideas and revisit some of the basic assumptions about the history of modern political thought and modernity as such The present volume is a sequel to Volume I Negotiating Modernity in the Long Nineteenth Century It begins with the end of the Great War depicting the colorful intellectual landscape of the interwar period and the increasing political and ideological radicalization culminating in the Second World War Taking the war experience both as a breaking point but in many ways also a transmitter of previous intellectual traditions it maps the intellectual paradigms and debates of the immediate postwar years marked by a negotiation between the democratic and communist agendas as well as the subsequent processes of political and cultural Stalinization Subsequently the post Stalinist period is analyzed with a special focus on the various attempts of de Stalinization and the rise of revisionist Marxism and other critical projects culminating in the carnivalesque but also extremely dramatic year of 1968 This volume is followed by Volume II Negotiating Modernity in the Short Twentieth Century and Beyond Part II 1968-2018 By Force of Thought

János Kornai, 2008-09-26 The intellectual autobiography of an economist influential in both command economies and free market economies that discusses his life work and the social and political environment during the Second World War the 1956 Hungarian Revolution and its aftermath and the post socialist transition Handbook of Global Political Policy Stuart Nagel, 2022-04-19 The latest in the six volume set of global policy handbooks this reference utilizes a cross national cross policy approach to examine the public policy of six different regions around the world Combining actual and theoretical perspectives the book compares and presents nonideological resolutions to current political conditions worldwide With contributions from over 30 international policy experts and academics and containing over 1200 literature references tables and drawings the book is an insightful resource for public administrators and public policy experts political scientists economists sociologists attorneys and students in these disciplines Behaviour and Institutions Under Economic Reform Wim Swaan, 1993 This book explores the process of economic reform in Hungary that has produced a remarkable
