The Acquisition of English Restrictive Relative Clauses by Hungarian Learners of English Judit Kiss-Gulyás,2004 The

present work uses the standard version of principles and parameters theory of Universal Grammar to address second language acquisition issues. It is assumed that comparative analysis of Hungarian and English based on the model enables the researcher to formulate precise and testable questions and the empirical research provides reliable answers. The investigated area is the acquisition of English restrictive relative clauses by L1 Hungarian learners of L2 English. This area of grammar causes problems: most of these are proficiency determined but there are some which are observable even at fairly advanced levels. In the given framework it is postulated that some properties of parameters set differently for the L1 can be reset to the new language whereas other properties seem to resist re-setting and remain non-native like in the interlanguage of even near-native L2 English speakers of L1 Hungarian. The book may interest pure and applied linguists, psycholinguists as well as practising teachers as it attempts to offer a possible answer to the often made observation that there are parts of L2 grammar which are relatively easy to acquire despite the language differences yet there are several features that remain faulty or misunderstood despite teacher and learner effort.

BOOK JACKET **L3 Development After the Initial State** Megan M. Brown-Bousfield, Suzanne Flynn, Éva Fernández-Berkes, 2023-10-15. To date the field of L3 acquisition research has had a heavy focus on the initial state of the L3 grammar. While this initial state research is critical to understanding L3 acquisition as a whole in order for an explanatory understanding of language acquisition in the multilingual mind, the field needs to expand its scope beyond this area of focus. This volume brings together L3 acquisition and multilingualism researchers in order to discuss the state of the field and introduce new ideas related to the development of post initial L3 knowledge and the relationship among languages in the multilingual mind. It includes contributions related to syntactic, phonological and lexical development beyond the L3 initial state. The purpose of this volume is to expand the current academic discussions within this field by emphasizing the role of the developmental process in an L3 context with the hope of inspiring further research in this domain.
