**Lightning and the Men Who Flew It** Wolfgang W. E. Samuel, Alfred Stettner,2025 The P 38 Lightning was one of the fastest operational fighters of World War II famous for its successes in North Africa and the Pacific In **The P 38 Lightning and the Men Who Flew It** Wolfgang W E Samuel shares the stories of the young men who climbed into the cockpits of the P 38 to fight for freedom and of those who created tested and deployed these fearsome machines The P 38 was the product of the Lockheed Corporation the first fighter they ever built principally conceptualized by Kelly Johnson whose design was to meet Air Corps specifications To do that he came up with a twin engine aircraft with a tricycle landing gear unlike any other military aircraft of the time But it was no easy plane to fly Many pilots died in training and routine flying before ever meeting an opponent in combat P 38 units were formed quickly once the United States entered World War II in December 1941 Training was rushed to get pilots and planes to Europe as quickly as possible to serve as bomber escorts Although the P 38 could fly at the high altitudes the bombers flew it was not the right aircraft for the mission At high altitudes without an engine in front of the cockpit to keep the pilot warm the plane was frigid Pilots suffered and were sometimes so weakened by the brutal cold that they had to be lifted out of the cockpit upon landing and the bombers suffered severe losses In North Africa s warmer air however the P 38 came into its own With four 50 caliber machine guns and a 20mm cannon in its nose the P 38 was a formidable adversary With proven success in the Mediterranean P 38 squadrons were transferred to the Pacific Theater where they flourished This book focuses on the men who flew this challenging aircraft and the men who designed and decided how to deploy it Samuel shares stories of bravery and ingenuity alongside an aviation history long neglected The P 38 s Pacific deployment is covered in some detail including the actions of Richard Bong who became the US forces ace of aces while flying a P 38 In the Pacific skies the P 38 its pilots and designers made the heroic history captured here      Deception in War Jon Latimer,2003-04-29 From the Trojan Horse to Gulf War subterfuge this far reaching military history examines the importance and ingenuity of wartime deception campaigns The art of military deception is as old as the art of war This fascinating account of the practice draws on conflicts from around the world and across millennia The examples stretch from the very beginnings of recorded military history Pharaoh Ramses II s campaign against the Hittites in 1294 B C to modern times when technology has placed a stunning array of devices into the arsenals of military commanders Military historians often underestimate the importance of deception in warfare This book is the first to fully describe its value Jon Latimer demonstrates how simple tricks have been devastatingly effective He also explores how technology has increased the range and subtlety of what is possible including bogus radio traffic virtual images even false smells **Deception in War** includes examples from land sea and air to show how great commanders have always had as Winston Churchill put it that indispensable element of legerdemain an original and sinister touch which leaves the enemy puzzled as well as beaten

Pauwels,2002-10-25 This book offers a fresh and provocative look at the role of the USA in World War II It spent four months on the nonfiction bestseller lists in Europe when it was first published in Belgium in 2000      **Fighting Lightnings** Michael

D. O'Leary,1988      **P-38 Lightning vs Ki-61 Tony** Donald Nijboer,2010-03-23 The air war in the South Pacific was unique and very different from other major air operations undertaken during World War II In no theater was air power more central to success than in the South Pacific The objective of every major strategic move was to seize an air base The air power employed was the most complex technology available and ironically it was employed over some of the most brutal primitive and largely unknown terrain in the world Much has been written about the major battles such as Pearl Harbor Midway Iwo Jima and Okinawa but very little focus has been paid to the vital battles that took place in New Guinea and the Solomons When hostilities in New Guinea began Japan possessed an advantage in air strength but as American and Australian strength grew the Japanese air arm suffered complete and utter defeat from which it would never recover Two of the aircraft that would see frequent combat in the New Guinea campaign were the Ki 61 Tony and P 38 Lightning The Ki 61 represented the rare occasion when Germany and Japan cooperated in a technical field Using the license built German DB 601A engine which powered the Bf 109E production of the Ki 61 began in August 1942 and the plane first flew a few weeks after Pearl Harbor On the other hand the P 38 was already in service albeit in small numbers Its speed firepower and range made it a formidable opponent and one for which the Japanese never had an answer the P 38 was ultimately credited with destroying more Japanese aircraft than any other USAAF fighter While the Ki 61 was well armed with two heavy machine guns and two German 20mm cannons it was not quite a match for the P 38 but the differences were slight and in a dogfight it often came down to the skill and even luck of the pilot at the controls This title explores the design and development technical specifications strategies combatants and statistics of each of these two aircraft complete with extensive photographs and specially commissioned artwork      **Lockheed P-38 Lightning** Jerry Scutts,2006 Lightning One of the best named aircraft

of WW2 the Lockheed P 38 was also one of the few fighters in production throughout hostilities Immediately recognizable by its twin boom tail layout the P 38 Lightning was one of the mainstays of the USAAF s fighter inventory Deployed in all theaters Lightnings excelled in most being one of the few American fighters armed with cannon Subject to lengthy development throughout the war the P 38 exemplified the technical peak reached by aeronautical engineers in the 1940s

*American Fighter-bombers in World War II* William Wolf,2003 Lost in the air combat and air ace fanfare of World War II was the dangerous unheralded and vital role played by USAAF fighter bomber pilots over the Mediterranean and northwest Europe Four times as many pilots were lost during strafing and ground attack sorties than were lost against the Luftwaffe in aerial combat This extensive book is the first in depth examination of American air to ground attack and explores numerous aspects of the subject The three priorities of the fighter bomber air superiority interdiction and close air support along with

combat reports and pilot narratives are put into the context of the various ground operations The fighter bomber pilot risked his life every day against the thickest flak in the war to deprive the enemy of vital reinforcements and supplies altering his strategy and movement
