## **P Adic Methods And Their Applications:**

*P-adic Methods and Their Applications* Serc Post-Doctoral Fellow Department of Mathematics Andrew J Baker, Andrew J. Baker, Roger J. Plymen, Reader Department of Mathematics Roger J Plymen, 1992 A number of texts have recently become available which provide good general introductions to p Adic numbers and p Adic analysis However there is at present a gap between such books and the sophisticated applications in the research literature The aim of this book is to bridge this gulf by providing a collection of intermediate level articles on various applications of p Adic techniques throughout mathematics The idea for producing such a volume was suggested by Oxford University Press in connection with a three day meeting p Adic Methods and their Applications held at Manchester University in September 1989 and which have received financial support from the London Mathematical Society Some of these articles grew out of talks given at this conference others were written by invitation especially for this volume All contributions were refereed with a particular view to their suitability for inclusion in such a book

**Ultrametric Pseudodifferential Equations and Applications** Andreĭ IĭUĭr'evich Khrennikov, Sergei V. Kozyrev, W. A. Zúñiga-Galindo, 2018-04-26 Provides a novel interdisciplinary perspective on the state of the art of ultrametric pseudodifferential equations and their applications

**p-Adic Methods in Number Theory and Algebraic Geometry** Alan Adolphson, Steven Sperber, Marvin Tretkoff, 1992 Two meetings of the AMS in the autumn of 1989 one at the Stevens Institute of Technology and the other at Ball State University included Special Sessions on the role of p adic methods in number theory and algebraic geometry This volume grew out of these Special Sessions Drawn from a wide area of mathematics the articles presented here provide an excellent sampling of the broad range of trends and applications in p adic methods

**Finite Fields and Applications** Dieter Jungnickel, H. Niederreiter, 2001-03-20 This volume represents the refereed proceedings of the Fifth International Conference on Finite Fields and Applications F q5 held at the University of Augsburg Germany from August 26 1999 and hosted by the Department of Mathematics The conference continued a series of biennial international conferences on finite fields following earlier conferences at the University of Nevada at Las Vegas USA in August 1991 and August 1993 the University of Glasgow Scotland in July 1995 and the University of Waterloo Canada in August 1997 The Organizing Committee of F q5 comprised Thomas Beth University of Karlsruhe Stephen D Cohen University of Glasgow Dieter Jungnickel University of Augsburg Chairman Alfred Menezes University of Waterloo Gary L Mullen Pennsylvania State University Ronald C Mullin University of Waterloo Harald Niederreiter Austrian Academy of Sciences and Alexander Pott University of Magdeburg The program of the conference consisted of four full days and one half day of sessions with 11 invited plenary talks and over 80 contributed talks that required three parallel sessions This documents the steadily increasing interest in finite fields and their applications Finite fields have an inherently fascinating structure and they are important tools in discrete mathematics Their applications range from combinatorial design theory finite geometries and algebraic geometry to coding theory cryptology and scientific computing A particularly fruitful aspect is

the interplay between theory and applications which has led to many new perspectives in research on finite fields     20
