**The Passive Voice** Babette Treptow,2013-02-27 Seminar paper from the year 2012 in the subject Didactics for the subject English Grammar Style Working Technique grade 1 0 Humboldt University of Berlin language English abstract Since English and German belong to the West Germanic family both languages are considered from a historical perspective closely related However English and German have developed in entirely different ways over time While English was strongly influenced by many foreign languages such as French German remained closer to the language group both originally derived from Precisely these divergent developments make a contrastive analysis between the two major languages particularly interesting Within this paper English and German will be compared with regard to the passive voice one form of the grammatical category voice that is according to K nig Gast 2009 123 easy to identify in English and German and rather unproblematic to compare In its general meaning the term voice is used interchangeably with diathesis In this sense the

concept of voice relates to the argument structure of predicates i.e. the relationship between thematic roles like Agent Patient Instrument and grammatical functions like subject and object as well as to the alternations found between different argument structures *ibid* While diathesis appears to be a characteristic of any verb voice in the more restricted understanding of the word means the form of a verb which shows whether the person or thing denoted by the subject acts or is acted upon Xavier 2008 50 The narrower concept of voice thus differentiates between the active and the passive In the course of my studies the grammatical phenomenon of voice has been used several times to exemplarily compare English with German The system of voice in English and German has been re introduced in the course of this semester's seminar English in Contrast Therefore my interest in this topic was already raised before the seminar and I found it particularly interesting to learn more about the differences of English and German passives As a future teacher of both of these major languages I consider this an excellent opportunity to gain a detailed inside into this matter This term paper aims at figuring out in how far the passive voice is different in English and German Despite both languages very same origin it is assumed that due to language change English and German show considerable differences in the passive voice The work by K nig Gast 2009 will be taken as the basis for a discussion on this question

**Common School Grammar: an Introduction to the Analytical and Practical Grammar** Peter Bullions,1871 **The Passive Voice in English and Russian** Irene M. Krouse,1966 The distinctive feature of voice in English and Russian is a property confined to transitive verbs In a sentence which is unmarked for the feature of voice the grammatical subject is the actor and the object is the recipient of the action In the sentence which is marked passive in voice the grammatical object is still the recipient of the action and the agent is still the instigator but certain overt changes have occurred in the grammatical forms serving as passive markers in the verb phrase The agent may or may not be mentioned and the latter is more preferable since the chief function of using a passive construction seems to

be to avoid the necessity of mentioning the agent Although the best method for testing the feature of voice is retransformation of passive sentences thus producing agnate pairs this method does not account for their actual occurrence By taking unpaired types selecting both animates and of sentences e g inanimates as subjects and objects and transforming or retransforming them it was found that passive sentences possess certain constraints e g animate subjects are more suitable agents of action and a passive construction is preferable when both subject and object are inanimate The study has however been concentrated on grammatically acceptable passive constructions in both languages and not on the frequency of their usage For this purpose string models were set up for each language and the following correspondences were established for all tenses aspects and moods which may be used in passive constructions [JKSSB Field Assistant Exam Guide 2021](#) Arihant Experts,2021-02-14 1 JKSSB Field Assistant is prepared for the upcoming exam 2 The book is divided into 6 main sections 3 Separate section is allotted for Current Affairs 4 2 practice sets for the revision of the concepts 5 We detailed answers are provided to all the questions Jammu and Kashmir Services Selection Board JKSSB has announced a recruitment notification for the posts of Field Assistant with total of 50 vacancies In order to attain good ranking and to get recruited in the departments of JKSSB one must have thorough preparation Here we introduce the preparatory guide JKSSB Assistant Compiler Recruitment Examination The book divides whole syllabus into 6 Main Sections as per the prescribed syllabus A separate section is allotted to Current Affairs giving the summarized information about the events around the globe Lastly it ends with 2 practice sets for the revision of the concepts Strictly based on the latest examination pattern in a highly simple language to facilitate the good understanding TOC Current Affairs General English Mathematics General Science General Knowledge GK with Special Reference to UT of J K Mental Ability Test Practice Test 1 2
