Nicolle Raven PUBLISHER TEKTIME **Artificial Intelligence and Evaluation** Steffen Bohni Nielsen, Francesco Mazzeo Rinaldi, Gustav Jakob Petersson, 2024-09-25 Artificial Intelligence and Evaluation Emerging

Technologies and Their Implications for Evaluation is a groundbreaking exploration of how the landscape of program evaluation will be redefined by artificial intelligence and other emerging digital technologies. In an era where digital technologies and artificial intelligence AI are rapidly evolving, this book presents a pivotal resource for evaluators navigating the transformative intersection of their practice and cutting edge technology. Addressing the dual dimensions of how evaluations are conducted and what is evaluated, a roster of distinguished contributors illuminate the impact of AI on program evaluation methodologies. Offering a discerning overview of various digital technologies, their promises and perils, they carefully dissect the implications for evaluative processes and debate how evaluators must be equipped with the requisite skills to harness the full potential of AI tools. Further, the book includes a number of compelling use cases demonstrating the tangible applications of AI in diverse evaluation scenarios. The use cases range from the application of GIS data to advanced text analytics. As such, this book provides evaluators with inspirational cases on how to apply AI in their practice as well as what pitfalls one must look out for. Artificial Intelligence and Evaluation is an indispensable guide for evaluators seeking to not only adapt to but thrive in the dynamic landscape of evaluation practices reshaped by the advent of artificial intelligence.

Challenges of the Modern Economy Yakhya G. Buchaev, Arsen S. Abdulkadyrov, Julia V.

Ragulina, Arutyun A. Khachaturyan, Elena G. Popkova, 2023-07-03. The book focuses on a systemic study of the challenges of the modern economy and related problems and areas of sustainable development of countries, regions and businesses, with particular attention paid to the new prospects offered by the spread of digital technology. The book's contribution to the literature is that it reveals the specifics and digital perspectives of supporting the SDGs in the economy at every level of the economy: country, regional and corporate, considering sectoral specificities. This is reflected in six parts of the book. Part 1 identifies contemporary challenges of the modern economy as barriers to sustainable development. Part 2 reflects the future direction of sustainable development of the countries. Part 3 considers the problems and prospects for sustainable development of regions. Part 4 focuses on the problems and prospects for the sustainable development of enterprises and industries. Part 5 sheds light on the economic and legal foundations and cooperative mechanisms of sustainable development. Part 6 offers recommendations for enhancing the use of digital technologies offered by Industry 4.0 to support the SDGs. Scientists whose research interests include sustainable economic development are the primary target audience for this book. For the primary target audience, the book forms a systemic view of the global challenges of sustainable development and offers a set of scientific and methodological recommendations to provide an effective response to these challenges at every level of the economy. An additional audience for the book is practicing experts who will find international best practices and applied recommendations to support sustainable economic development and implementation of the SDGs in the practice of state, national regulation and public administration of the region and corporate in various industries management.

#### **Integrating Digital Literacy in the Disciplines** Lauren Hays,Jenna

Kammer,2023-07-03 Digital literacy has become the vital competency that students need to master before graduating This book provides rich examples of how to integrate it in disciplinary courses While many institutions are developing introductory courses to impart universal literacy skills students need to know and creative literacy skills for creating new content discipline specific skills skills needed to succeed within a specific discipline are a vital extension to their learning and ability to apply digital literacy in different contexts This book provides examples of how to integrate digital literacy across a wide variety of courses spanning many domains Rather than a wholly new core institutional outcome digital literacy adds to the development of critical thinking communication problem solving and teamwork skills by building students capacities to assess online information so they can ethically share communicate or repurpose it through the appropriate use of available digital technologies In short it provides the vital digital dimension to their learning and the literacy skills which will be in increasing demand in their future lives Following introductory chapters providing context and a theoretical framework the contributing authors from different disciplines share the digital competencies and skills needed within their fields the strategies they use to teach them and insights about the choices they made What shines through the examples is that regardless of the specificity of the disciplinary examples they offer all readers a commonality of approach and a trove of ideas that can be adapted to other contexts This book constitutes a practical introduction for faculty interested in including opportunities to apply digital literacy to discipline specific content The book will benefit faculty developers and instructional

designers who work with disciplinary faculty to integrate digital literacy. The book underscores the importance of preparing students at the course level to create and be assessed on digital content as fields are modernizing and delivery formats of assignments are evolving. Domains covered include digital literacy in teacher education, writing, musicology, indigenous literary studies, communications, journalism, business, information technology, strategic management, chemistry, biology, health sciences, optometry, school librarianship, and law. The book demonstrates a range of approaches that can be used to teach digital literacy skills in the classroom, including Progressing from digital literacy to digital fluency, Increasing digital literacy by creating digital content, Assessment of digital literacy, Identifying ethical considerations with digital literacy, Sharing digital content outside of the classroom, Identifying misinformation in digital communications, Digitizing instructional practices like lab notes and essays, Reframing digital literacy from assumption to opportunity, Preparing students to teach digital literacy to others, Collaborating with other departments on campus to support digital literacy instruction, Incorporating media into digital literacy, digital media literacy, Using digital storytelling and infographics to teach content knowledge, Weaving digital literacy throughout the curriculum of a program and with increasing depth.
