**Nazi Moonbase** Graeme Davis,2016-04-21 In the dying days of World War II Nazi Germany spent increasingly large amounts of its dwindling manufacturing capability on the construction of a small fleet of flying saucers capable of travel beyond the atmosphere While these saucers were too few in number to affect the eventual outcome of the war they did allow for a small but fanatical Nazi group to escape Germany first to Antarctica and then on to the moon For the first time the history of the Nazi space program has been revealed with a focus on the design construction and layout of the moonbase Using detailed maps the entire moonbase is reconstructed noting the locations of various important features such as weapon emplacements the Vril generator the air recyclers and water extractors The book also covers the various attempt by the allies to overcome this last Nazi stronghold through both subterfuge and outright battle

*Soviet and Russian Lunar Exploration* Brian Harvey,2007-08-17 When in July 1969 the Americans decisively beat the Soviet Union in the race to put an astronaut on the moon this event had profound historical scientific and political implications This book tells the story of the Soviet and Russian lunar programme from its origins to the reconsideration of a lunar programme in the present day federal Russian space programme Following Sputnik the first Soviet lunar flights achieved the key goals of hitting circling and photographing the moon in 1959 The Soviet Union planned to achieve the biggest prize of them all the first person to land on the moon and built all the key spaceships required to do so such as a lunar orbiter and lander Brian Harvey describes the techniques devised by the USSR for lunar landing from the LK lunar module to the LOK lunar orbiter and tested versions in Earth orbit He asks whether these systems would have worked and examining how well they were tested concludes that they would have the Soviet Union lost the moon race for political not technical reasons Designs for moon bases were even drawn up In the end the Soviet Union ran an impressive series of robotic missions from 1968 to 1976 to circle the moon map the far side conduct

Tubb, 2011-09-29 On the airless surface of the Moon the cold war continues with the bases of the major world powers watching each other and waiting The

dedicated personnel of Britain's Moon Base seemed well adjusted to their peculiar existence despite a series of mysterious happenings. What bothers them most is the visit of a Royal Commission sent by an economically worried British Government to investigate expenditure. Travelling with the Commission but under separate and secret orders is Felix Larsen who's investigations are of quite a different nature. Larsen alive to the possibilities of espionage soon finds himself faced with the inexplicable. Why should one man fall a thousand feet and escape with minor bruises while another dies after falling a mere eighteen inches? Why does a desperate man bent on suicide and with all the means at hand find it absolutely impossible to kill himself? What are the strange messages emanating from the Base and from whence do they come? And what is the fantastic thing that has been conceived in the research department?      **Iron Age, 1913      Annual Report of the Railroad Commission of Indiana**      Railroad Commission of Indiana, 1913
