Moon Missions

Brandon R. Brown

Moon Missions:

Moon Missions Edward Close, 1900-01-01 The Space Race of the mid 1900s took humankind where it had never gone before the moon. This volume takes readers on their own moon mission as it outlines a contest of ultimate exploration. recounts the Apollo missions and adds depth with stellar detail and stunning visual aids **The Apollo Chronicles** Brandon R. Brown, 2019-05-08 The moon landing of 1969 stands as an iconic moment for both the United States and humankind. The familiar story focuses on the journey of the brave astronauts who brought home Moon rocks and startling photographs. But Apollo's full account includes the earthbound engineers mounds of their crumpled paper and smoldering metal shards of exploded engines. How exactly did the nation step by difficult step take men to the Moon and back? In *The Apollo Chronicles* fifty years after the moon landing author Brandon R. Brown himself the son of an Apollo engineer revisits the men and women who toiled behind the lights. He relays the defining twentieth century project from its roots bringing the engineers' work and personalities to bright life on the page. Set against the backdrop of a turbulent American decade the narrative whiskers audiences through tense deadlines and technical miracles from President John F. Kennedy's 1961 challenge to NASA's 1969 lunar triumph as engineers confronted wave after wave of previously unthinkable challenges. Brown immerses readers in key physical hurdles from building the world's most powerful rockets to keeping humans alive in the hostile void of space using language free of acronyms and technical jargon. The book also pulls back from the detailed tasks and asks larger questions: What did we learn about the Moon? And what can this uniquely innovative project teach us today? [Apollo Moon Missions](#) Billy W. Watkins, 2005-12-30 In 1961 President John F. Kennedy issued a challenge: the United States would land a man on the moon and return him safely to Earth before the end of the decade. It seemed like an impossible task and one that the Russians who had launched the first satellite and put the first man into Earth orbit would surely perform before us. The ingenuity, passion, and sacrifice of thousands of ordinary men and women from all walks of life enabled the space program to meet this extraordinary goal. In all six crews would land on the moon before Congress withdrew financial backing for the program. This is the story of the men and women who worked behind the scenes without fanfare or recognition to make these missions a success. Thirty years later they still speak of Apollo with pride sometimes even awe. After Apollo moonwalker John Young told journalist Billy Watkins in a 1999 interview that nobody knows anything about the people who helped make those flights so successful. Watkins made it his mission to identify the unsung heroes and learn their stories. His subjects include Julian Scheer NASA publicist Sonny Morea lead designer of the Lunar Rover Hugh Brown one of the few African Americans who worked on the Apollo program JoAnn Morgan one of the few women involved in the space program Joan Roosa widow of Apollo 14 astronaut Stuart Roosa Joe Schmitt veteran suit technician was responsible for making sure the suits were leak proof and hooked up correctly Joseph Laitin who came up with the idea for the Apollo 8 astronauts to read the first ten verses of Genesis during their Christmas Eve television broadcast from the moon and Clancy Hatelberg the Navy diver who plucked

Baker,2019-07-09 Published to coincide with the 50th anniversary of the first Moon landing by Apollo 11 The story of Apollo has been told many times but most accounts stop at the first landing This book picks up where others have left off and describes the five post Apollo 11 Moon landings defined as technical developments built upon engineering excellence It was only through the robust design adopted when aerospace contractors first designed and built the Apollo spacecraft and the Lunar Module that successive evolutions were possible taking lunar landing operations far beyond what had first been envisaged This book is not intended to tell the full story of each mission but rather to describe the technical development of spacecraft and equipment necessary to grow the capability from a single EVA moonwalk of less than three hours to advanced missions where astronauts spent three full working days exploring their landing sites With the aid of a Lunar Roving Vehicle they collected a wide variety of rocks and soil and left a range of instruments at the surface powered by a thermonuclear generator As interest grows in humans returning to the Moon 50 years on from those pioneering days of lunar exploration we look again at what was accomplished at the dawn of the Space Age spurred on by a political goal and developed as a tool for science The story of the Apollo Moon missions is an expression of those achievements
