## **Moral Reality:**

*Moral Reality* Paul Bloomfield, 2001 Paul Bloomfield offers a rigorous defense of moral realism developing an ontology for morality that models the property of being morally good on the property of being physically healthy The model is assembled systematically it first presents the metaphysics of healthiness and goodness then explains our epistemic access to properties such as these adds a complementary analysis of the semantics and syntax of moral discourse and finishes with a discussion of how we become motivated to act morally Bloomfield closely attends to the traditional challenges facing moral realism and the discussion ranges from modern medical theory to ancient theories of virtue and from animal navigation to the nature of normativity

*Moral Reality* Paul Bloomfield, 2001 *Reality and Morality* Billy Dunaway, 2020-07-03 Reality and Morality develops and defends a framework for moral realism It defends the idea that moral properties are metaphysically elite or privileged parts of reality and argues that realists can hold that this makes them highly eligible as the referents for our moral terms an application of a thesis sometimes called reference magnetism Billy Dunaway elaborates on these theses by introducing some natural claims about how we can know about morality by having beliefs that are free from a kind of risk of error This package of theses in metaphysics meta semantics and epistemology is motivated with a view to explaining possible moral disagreements Many writers have emphasized the scope of moral disagreement and have given compelling examples of possible users of moral language who appear to be genuinely disagreeing rather than talking past one another with their use of moral language What has gone unnoticed is that there are limits to these possible disagreements and not all possible users of moral language are naturally interpreted as capable of genuine disagreement The realist view developed in Reality and Morality can explain both the extent of and the limits to moral disagreement and thereby has explanatory power that counts significantly in its favour

**The Moral Universe** John Bengson, Terence Cuneo, Russ Shafer-Landau, 2024-06-24 The Moral Universe marks an important advance in metaethical thinking offering the most sustained and sophisticated development of nonnaturalistic moral realism to date Employing a novel philosophical method it addresses central questions in metaethics concerning the nature of moral reality its fundamental laws its relation to the natural world and its normative authority The authors advance new ways of answering these questions contending that moral standards regarding what to do and how to be are not only objectively authoritative but essentially so Rather than arising from personal schemes or collective ideals morality flows from the nature of things One of the principal aims of the book is to show how this view accommodates and explains a wide range of data concerning the metaphysical and normative dimensions of morality Along the way the book offers novel characterizations of moral realism and nonnaturalism defends and explains the existence of substantive moral conceptual truths supplies a new treatment of moral supervenience substantiates the categoricity and importance of moral reasons and presents a strategy for identifying the source of morality Exemplifying a commitment to the integrity of moral philosophy The Moral Universe also tackles fundamental issues in value theory and normative ethics in the service of

developing a systematic explanatorily potent version of nonnaturalist realism     [Moral Realism](#) Russ Shafer-Landau,2003-06-19 Moral Realism is a systematic defence of the idea that there are objective moral standards In the tradition of Plato and G E Moore Russ Shafer Landau argues that there are moral principles that are true independently of what anyone anywhere happens to think of them These principles are a fundamental aspect of reality just as much as those that govern mathematics or the natural world They may be true regardless of our ability to grasp them and their truth is not a matter of their being ratified from any ideal standpoint nor of being the object of actual or hypothetical consensus nor of being an expression of our rational nature Shafer Landau accepts Plato s and Moore s contention that moral truths are *sui generis* He rejects the currently popular efforts to conceive of ethics as a kind of science and insists that moral truths and properties occupy a distinctive area in our ontology Unlike scientific truths the fundamental moral principles are knowable *a priori* And unlike mathematical truths they are essentially normative intrinsically action guiding and supplying a justification for all who follow their counsel Moral Realism is the first comprehensive treatise defending non naturalistic moral realism in over a generation It ranges over all of the central issues in contemporary metaethics and will be an important source of discussion for philosophers and their students interested in issues concerning the foundations of ethics     **Oxford Studies in Metaethics, Volume 19**

Russ Shafer-Landau,2024-05-20 Oxford Studies in Metaethics is the only publication devoted exclusively to original philosophical work in the foundations of ethics It provides an annual selection of much of the best new scholarship being done in the field Its broad purview includes work being done at the intersections of ethical theory with metaphysics epistemology philosophy of language and philosophy of mind The essays included in the series provide an excellent basis for understanding recent developments in the field those who would like to acquaint themselves with the current state of play in metaethics would do well to start here     **Proceedings of the Aristotelian Society for the Systematic Study of Philosophy**

**Pragmaticist Argument for the Assumption of Moral Reality** Timothy Aaron Sparks,2011 I make a pragmaticist argument for the assumption of absolute universal ultimate objective moral reality This is a pragmaticist argument because it follows the lines of Charles S Peirce s argument for physical reality and scientific progress Pragmaticists must make the assumption of moral reality because in certain important moral dilemmas we can argue that one set of norms is better than another only if there is an absolute universal ultimate objective set of norms Essentially absolute universal ultimate objective moral reality though understood only fallibly is the only measuring tool sufficient for claims of deep moral progress The Deweyan pragmatist thinkers that I consider each attempt to replace absolute universal ultimate objective moral reality with some other form of objectivity in morality as a basis for this type of progress I argue that there is no substitute for absolute universal ultimate objective moral reality to serve as the measuring tool for deep moral progress Ironically I enlist Richard Rorty to defend my position on this point while also showing that his claims of progress are insufficient However I will obviously go further than Rorty by asserting that the solution to the problem is to appeal to the assumption of moral reality He and others already listed would undoubtedly object that the appeal to the assumption of moral reality has usually had negative consequences for the well being of society The difference between my appeal to absolute moral reality and the historical appeal is that my appeal is to an admittedly fallible understanding of that reality Thus my appeal allows for tolerance of the views of others whenever possible while retaining the ability to condemn certain acts on absolute terms in spite of any existing cultural mores I close the thesis with a consideration of J rgan Habermas discourse ethics I argue that discourse ethics alone is insufficient for deep moral progress in some cases but when one first assumes that moral reality exists discourse ethics becomes a procedure for arriving at a fallibly held moral consensus which would eventually approximate Peirce s ideal limit of inquiry

Retribution Thom Brooks,2019-10-30 Retribution is perhaps the most popular contemporary theory about punishment and has enjoyed enduring appeal as the oldest even most venerable penal theory with its strong ancient roots Retribution is understood in many different ways but the standard view of retribution is that punishment is justified where it is deserved and an offender should be punished in proportion to his desert In this volume retributivism is examined from various critical perspectives including its diversity relation with desert the link between desert and proportionality retributivist emotions and the idea of mercy The theory of retribution has been the subject of a revival of interest in recent years and the essays selected for this volume are the leading works on retribution from the dominant international figures in the field
