Moral Theory Poststructuralism:

The Moral Theory of Poststructuralism Todd May, 2010-11-01 **Constructing Foucault's ethics** Mark Olssen, 2021-06-15 In popularizing the term speaking truth to power now widely used throughout the world Michel Foucault established the basis upon which a new ethics can be constructed This is the thesis that Mark Olssen advances in *Constructing Foucault's ethics* Olssen not only speaks truth to existing moral and ethical theories that have dominated western philosophy since Plato but also shows how by using Foucault's insights an alternative ethical and moral theory can be established that both avoids the pitfalls of postmodern relativism and simultaneously grounds ethical moral and political discourse for the present age Taking the late ethical turn in the philosopher's thought as its starting point this ambitious study seeks to construct an ethics beyond anything Foucault ever attempted while remaining consistent with his core postulates In doing so it advances the concept of life continuance which expresses a normative orientation to the future in terms of the quest for survival and well being giving rise to irreducible normative values as part of the discursive order of events This approach is explored in contrast with a range of other established systems from the Kantian to the Marxist to contract ethics and utilitarianism

Ethics and Politics after Poststructuralism Madeleine Fagan, 2013-09-16 What would political thought look like without the foundation of ethics Drawing on the work of Emmanuel Levinas Jacques Derrida and Jean Luc Nancy Madeleine Fagan puts forward a radical and far reaching refusal of foundational ethics Instead she proposes an account of the inseparability of ethics and politics The ethical should not be understood as a label it does not mean good or right it is not an evaluation or guide Rather both the ethical and the political are descriptions of the context in which we find ourselves The book highlights the necessity of a practice based rethinking of the relationship between ethics and politics and so denaturalises a series of commonplaces about poststructuralist ethics

Bridging Complexity and Post-Structuralism Minka Woermann, 2016-09-27 This work addresses the topic of philosophical complexity which shares certain assumptions with scientific complexity cybernetics and General Systems Theory but which is also developing as a subject field in its own right Specifically the post structural reading of philosophical complexity that was pioneered by Paul Cilliers is further developed in this study To this end the ideas of a number of contemporary French post structural theorists and their predecessors including Derrida Nancy Bataille Levinas Foucault Saussure Nietzsche Heidegger and Hegel are introduced The implications that their various insights hold for our understanding of complex human systems are teased out at the hand of the themes of economy social ontology subjectivity epistemology and ethics The analyses are also illuminated at the hand of the problematic of the foreigner and the related challenges of showing hospitality to foreigners The study presents a sophisticated account of both philosophical complexity and philosophies of difference By relating these subject fields the study also extends our understanding of philosophical complexity and offers an original characterisation of the aforementioned philosophers as complex thinkers

Anarchist Pedagogies Robert H. Haworth, 2012-08-01 Education is a

challenging subject for anarchists Many are critical about working within a state run education system that is embedded in hierarchical standardized and authoritarian structures Numerous individuals and collectives envision the creation of counterpublics or alternative educational sites as possible forms of resistance while other anarchists see themselves as saboteurs within the public arena believing that there is a need to contest dominant forms of power and educational practices from multiple fronts Of course if anarchists agree that there are no blueprints for education the question remains in what dynamic and creative ways can we construct nonhierarchical anti authoritarian mutual and voluntary educational spaces Contributors to this edited volume engage readers in important and challenging issues in the area of anarchism and education From Francisco Ferrer s modern schools in Spain and the Work People s College in the United States to contemporary actions in developing free schools in the U K and Canada to direct action education such as learning to work as a street medic in the protests against neoliberalism the contributors illustrate the importance of developing complex connections between educational theories and collective actions Anarchists activists and critical educators should take these educational experiences seriously as they offer invaluable examples for potential teaching and learning environments outside of authoritarian and capitalist structures Major themes in the volume include learning from historical anarchist experiments in education ways that contemporary anarchists create dynamic and situated learning spaces and finally critically reflecting on theoretical frameworks and educational practices Contributors include David Gabbard Jeffery Shantz Isabelle Fremeaux John Jordan Abraham P DeLeon Elsa Noterman Andre Pusey Matthew Weinstein Alex Khasnabish and many others **The Grove Encyclopedia of American Art** Joan M. Marter,2011 Arranged in alphabetical order these 5 volumes encompass the history of the cultural development of America with over 2300 entries **Ethics with Morality** Jerry Miller,2001

Politics and Post-structuralism Alan Finlayson,Jeremy Valentine,2002 Post structuralism is recognised as a major force within literary and cultural studies This book is the first to apply the theory to politics and to show the ways in which it can illuminate political theory and analysis As such it is likely to become a key text in the development of this area providing a stimulating introduction to the subject Authors explore the two way relationship showing not only that post structuralism can enhance the study of politics but also that advocates of post structuralism can benefit from being open to the lessons political studies can teach The book aims to Clarify the relationship of contemporary theory to politics Open up a new intellectual interface Create a space for exchange between disciplines Provide a statement of the role of post structuralist theory in politics Covering three main sections What is Post structuralist Political Theory Post structuralism and Political Analysis and The Question of the Political the authors draw on themes raised by Continental thinkers such as Derrida Nancy and Deleuze and Anglo American thinkers such as Butler and Connolly in their questioning of the theoretical and empirical understanding of contemporary politics Key Features First systematic examination of post structuralism to see what it may mean for political studies Advances its own rigorous and theoretically informed position Cutting edge provides a vibrant introduction

to this area of political thought and analysis Brings clarity to the two way relationship between post structuralism and politics Religion, Morality and Transformation University of South Africa. Willis,2008 *Truth and Consequences* Reed Way Dasenbrock,2001 Contemporary literary theory takes truth and meaning to be dependent on shared conventions in a community of discourse and views authors intentions as irrelevant to interpretation This view argues Reed Way Dasenbrock owes much to Anglo American analytic philosophy as developed in the 1950s and 1960s by such thinkers as Austin and Kuhn but it ignores more recent work by philosophers like Davidson and Putnam who have mounted a counterattack on this earlier conventionalism This book draws on current analytic philosophy to resuscitate the notion of objective truth and intentionalist models of meaning and interpretation thereby moving beyond the antifoundationalism of postmodern theory It addresses the work of Rorty and Fish as representative of literary conventionalism discusses the futility of Derrida s anti intentionalism and shows how poststructuralist thinkers like Althusser and Foucault have contributed to the new thematics of race class gender and sexual orientation that dominates literary theory today Examining the counter arguments of conventionalists to have their theory judged by its consequences Dasenbrock shows how damaging this antiobjectivism and anti intentionalism have been for literary studies **After Poststructuralism** Nancy Easterlin,Barbara Riebling,1993 After Poststructuralism Interdisciplinary and Literary Theory challenges the premises of and suggests new alternatives to the more extreme approaches in current literary theory The essays collected here examine the trend of theorizing in interdisciplinary studies from the perspective of more rigorous research methodologies with the aim of establishing the validity of interdisciplinary literary studies and broadening the field of inquiry The collection is divided into three groups The first examines the question of what interdisciplinarity has meant in literary studies in the last twenty years the reasons for its ascension as a trend and the inherent theoretical flaws in certain poststructuralist positions The second explores the relationship of theory and practice while the third group looks ahead to the rich possibilities for thinking and working in practical new directions *Forthcoming Books* Rose Arny,1995 Ethics and Aesthetics of Freedom in American and Chinese Realism Wenying Xu,2003 The goal of this monograph is to complicate the postmodernist argument that art is always already political and does so by studying literary realism as practiced by American and Chinese writers utilizing the perspective of Michel Foucault It performs a careful reading of Henry James s *The Portrait of a Lady* and *The Princess Casamassima* William Dean Howell s *A Hazard of New Fortunes* and *The World of Chance* Liu Binyan s *People or Monster* and *Sound is Better Than Silence* and Zhang Xianliang s *Half Man is Woman* and *Getting Used to Dying* It demonstrates that both sets of realist writers provide
