Moral Psychology:

Character and Moral Psychology Christian B. Miller, 2014-01-09 Philosophers and psychologists have been hard at work trying to unlock the mysteries of our characters. Unfortunately their answers have been all over the map. According to one position every single person has all of the moral virtues such as modesty and compassion although to varying degrees. Yet according to another position no one has any character traits at all since they are simply illusions and do not exist. Hence not one person is honest or compassionate or courageous. And between these extremes there are plenty of intermediate views. Christian B. Miller argues that not one of these leading positions accurately reflects what most of us are like today. He explores the implications of the Mixed Trait framework a theory of moral character developed in his previous book *Moral Character: An Empirical Theory*. Mixed traits have both morally positive aspects hence they are not vices along with morally negative aspects hence they are not virtues. Miller engages with the other leading positions on the empirical nature of character: situationism, the CAPS model, the Big Five model and the local trait model. He goes on to apply the Mixed Trait framework to several important topics in ethics especially the development of an error theory about judgments of character and the challenge faced by virtue ethics from the widespread lack of virtue.

Moral Psychology Mark Alfano, 2016-09-06

Moral psychology is the systematic inquiry into how morality works when it does work and breaks down when it doesn't work. In this comprehensive new textbook Mark Alfano outlines the five central concepts in the study of moral psychology: agency, patency, sociality, temporality and reflexivity. Subsequent chapters each assess a key area of research which Alfano relates both to the five central concepts and to empirical findings. He then draws out the philosophical implications of those findings before suggesting future directions for research. One of Alfano's guiding themes is that moral philosophy without psychological content is empty whereas psychological investigation without philosophical insight is blind. He advocates and demonstrates a holistic vision that pictures moral psychology as a project of collaborative inquiry into the descriptive and normative aspects of the human condition. Featuring a glossary of technical terms, further reading sections and chapter by chapter study questions this rich systematic and accessible introduction to moral psychology will be suitable for both undergraduates and researchers in philosophy, psychology and related fields.

Moral Psychology, Volume 2 Walter Sinnott-Armstrong, 2007-10-26 For much of the twentieth century philosophy and science went their separate ways. In moral philosophy fear of the so-called naturalistic fallacy kept moral philosophers from incorporating developments in biology and psychology. Since the 1990s however many philosophers have drawn on recent advances in cognitive psychology, brain science and evolutionary psychology to inform their work. This collaborative trend is especially strong in moral philosophy and these three volumes bring together some of the most innovative work by both philosophers and psychologists in this emerging interdisciplinary field. The contributors to volume 2 discuss recent empirical research that uses the diverse methods of cognitive science to investigate moral judgments, emotions and actions. Each chapter includes an essay, comments

on the essay by other scholars and a reply by the author s of the original essay Topics include moral intuitions as a kind of fast and frugal heuristics framing effects in moral judgments an analogy between Chomsky s universal grammar and moral principles the role of emotions in moral beliefs moral disagreements the semantics of moral language and moral responsibility Contributors to Volume 2 Fredrik Bjorklund James Blair Paul Bloomfield Fiery Cushman Justin D Arms John Deigh John Doris Julia Driver Ben Fraser Gerd Gigerenzer Michael Gill Jonathan Haidt Marc Hauser Daniel Jacobson Joshua Knobe Brian Leiter Don Loeb Ron Mallon Darcia Narvaez Shaun Nichols Alexandra Plakias Jesse Prinz Geoffrey Sayre McCord Russ Shafer Landau Walter Sinnott Armstrong Cass Sunstein William Tolhurst Liane Young **Moral Psychology** Valerie Tiberius,2014-05-30 This is the first philosophy textbook in moral psychology introducing students to a range of philosophical topics and debates such as What is moral motivation Do reasons for action always depend on desires Is emotion or reason at the heart of moral judgment Under what conditions are people morally responsible Are there self interested reasons for people to be moral Moral Psychology A Contemporary Introduction presents research by philosophers and psychologists on these topics and addresses the overarching question of how empirical research is or is not relevant to philosophical inquiry **The Oxford Handbook of Moral Psychology** Manuel Vargas,John Doris,2022-03-24 Moral
