Massachusetts. Board of Conciliation and Arbitration, 1921 *Borders, Legal Spaces and Territories in Contemporary International Law* Tommaso Natoli, Alice Riccardi, 2019-09-12 This book examines the challenges posed to contemporary international law by the shifting role of the border which has recently re emerged as a central issue in international relations It posits that borders do not merely correspond to States boundaries indeed while remaining a fundamental tool for asserting States power they are in fact a collection of constantly changing spatial limits Consequently the book approaches borders as context specific limits and revisits notions traditionally linked to them jurisdiction sovereignty responsibility individual rights while also adopting the innovative approach of viewing borders as phenomena of both closedness and openness Accordingly the first part of the book addresses what happens within borders investigating the root causes of the emergence of spatial limits and re assessing apparent extra territorial assertions of State power In turn the second part not only explores typical borderless spaces but also more generally considers the exercise of States and international organisations powers and prerogatives across or beyond borders **Defining the Limits of Outer Space for Regulatory Purposes** Olavo de

Oliviera Bittencourt Neto, 2015-05-14 With different countries ascribing to different theories of air space and outer space law Dr Bittencourt Neto proposes in this Brief a reassessment of the international law related to the extension of state territories vertically Taking into consideration the vast number of proposals offered by scholars and diplomatic delegations on this subject matter as well as the principles of comparative law a compromise to allow for peaceful development is the only way forward The author argues for setting the delimitation of the frontier between air space and outer space at 100 km above mean sea level through an international treaty This would also regulate passage rights for space objects during launchings and reentries as long as those space activities are peaceful conducted in accordance with international law and respecting

the sovereign interests of the territorial State Continuing expansion of the commercial space industry and conflicting national laws require a stable and fair legal framework best adjudicated by the United Nations instead of allowing a patchwork system to persist The proper framework for developing such regulation is carefully discussed from all angles with a practical recommendation for policy makers in the field

**Mattering Spiritualities** Silvia Battista, David Mason, 2025-03-31 Mattering Spiritualities brings together an array of international scholars and practitioners to explore spirituality in embodiment through the lens of performance performative writing and performance studies The book concerns spirituality and takes the body as the site of whatever it is we call spirituality The methodological assumption is that the opposition of body and spirit is a false binary that calls for re examination and revision It stems from the argument that people can deliberately shift their boundaries of perception and knowing through practice technologies and performative techniques that can alter the way in which they perceive the ecologies in which they are embedded This approach understands that careful attention to which bodies are performing in any given scenario is crucial as is a sensitivity to the ramifications of any body's race gender class and biological ability Performance can therefore be regarded as anything through which individuals and collectives experiment with bodies as technologies Each chapter engages with such experiments to explore how bodies experience and relate to other bodies human and other than human but also how by mobilizing bodies and changing relationships between them practitioners can transform people spaces and places objects ecologies large and small and shift the borders of the known Such experiments can also reveal intersectional dynamics within given social political and biological borders offering new perspectives and angles of analysis This collection intends to serve transdisciplinary studies and to support varied learning and teaching environments for undergraduate postgraduate and PhD students
