Ozone Discourse:

Ozone Discourses Karen Litfin, 1994 How can scientific knowledge be translated into political change Ozone Discourse examines the first global environment treaty the Montreal Protocol and its subsequent revisions which was a highly effective collaboration among scientists policymakers and activists The treaties were the work of a small group of experts who without conventional political or economic resources were able to persuade most of the world's nations to agree to reduce and then eliminate chlorofluorocarbons These experts used their understanding of atmospheric science to supplement the policymakers short term perspective with a wider intergenerational timeframe characteristic of global environmental problems Litfin argues that the discipline of international relations requires a broader conception of power in order to accommodate the knowledge based problems such as environmental degradation *Corpus-Assisted Ecolinguistics* Robert Poole, 2022-05-05 Corpus Assisted Ecolinguistics introduces and integrates key research concepts principles and techniques in ecolinguistics and corpus assisted discourse study answering foundational questions for researchers new to the discipline and asserting the urgent need to expand its scope Breaking new ground the book analyzes under explored environmental discourses that have a tangible impact on ecological wellbeing and sustainability by perpetuating harmful attitudes practices and ideologies Chapters present in depth case studies including an analysis of the evolving representations of wilderness an eco stylistic analysis of a popular novel and an investigation of the use of humor in reports on animal escapes from slaughterhouses The studies employ a range of corpus analysis techniques to show how ecological degradation and crisis have become normalized and even trivialized in popular discourse but also spaces where positive discourse practices are present By applying tools from corpus linguistics to a diverse range of environmental discourses this book makes a significant contribution to advancing the field of ecolinguistics **Pamphlets on Biography (Kofoid Collection)**, 1891
