9144 m the flaps froze it was impossible to open the cabin hood and the forces on the rudders were very big At high speeds the paint covering the elevators fell off and the aerodynamic pressure inflated their sheath they were covered with canvas causing dangerous tail vibrations To remedy these problems metal sheathing was introduced elevators shape was changed and weight flaps were added The propulsion of the P 47B version was a 2000 HP R 2800 21 engine The time to reach the ceiling of 4572 m was 6 7 minutes The aircraft developed a speed of 690 km h at an altitude of 8230 m in horizontal flight which was a great result    **Republic P-47 Thunderbolt** Jerry Scutts, 1998 The distinctive rugged lines of this heavyweight single seater earned it the nickname the jug But what the Thunderbolt lacked in elegance it more than made up for in firepower Of the 15 683 Thunderbolts built only 54 airframes are known to exist today This book provides a generously illustrated and thoroughly researched tribute to the aircraft
