

A young man and woman are standing in a park at dusk. The man is holding a smartphone and looking at the screen. The woman is leaning her head on his shoulder, also holding a smartphone and looking at it. They are both wearing denim shirts. The background is a blurred park with trees and warm lights.

Leeder, Lee C. Beaumont, 2025-02-11 Lifestyle sports have witnessed unprecedented growth in recent years with it being accepted that these activities can contribute significantly to national

sport and physical activity agendas appeal to contemporary youth culture and provide an alternative to mainstream achievement sports within school physical education. However, this popularity has led to increased professionalisation and institutionalisation, meaning there is now a demand for educated teachers and coaches to facilitate learning through effective pedagogical approaches. Consequently, *Teaching and Coaching Lifestyle Sports: Research and Practice* is the first book of its kind to provide both theoretical and empirical insights into the process and practice of teaching and coaching lifestyle sports across school, community and high performance sport contexts. Drawing upon a variety of lifestyle sports including skateboarding, freestyle BMX, parkour and freeskiing, this book develops readers' understanding and conceptualisation of the issues, challenges and opportunities associated with teaching and coaching lifestyle sports. Each chapter, grouped via a broad focus on either teaching or coaching, offers novel perspectives towards current trends, pedagogical approaches and steps forward in relation to lifestyle sports within physical education and sport coaching. This book covers contemporary and important topics within lifestyle sports such as coach development, enhancing youth sport participation, facilitating athlete learning and creating a meaningful physical education experience. Drawing upon global examples, each chapter generates new knowledge associated with the teaching and coaching of lifestyle sports while critically discussing areas for future research alongside practical implications for teachers, coaches and sports organisations. *Teaching and Coaching Lifestyle Sports: Research and Practice* is a valuable resource for researchers and academics, in addition to students and practitioners who are currently working across the overlapping fields of physical education, sport coaching, sport development and leisure studies, or have an interest in lifestyle sports.
