Marigold Field:

National Approaches to Hydrocarbon Development Eduardo G. Pereira, Marianthi Pappa, Damilola S.

Olawuyi, 2025-01-20 This book analyses the legal obstacles associated with the advancement of unitization processes and procedures at a national domestic level. It uses case studies of identified jurisdictions with relevant States practice and unitization experience in terms of the domestic legal framework and practices. For experience in unitization the book will focus on the following countries: the United States, Canada, the United Kingdom, Norway, Brazil, Mexico, Ghana, and Nigeria. Focusing on best practices which have influenced the development of the unitization concept, the book looks at the formulation of different models and operating agreements and their potential impact on unexplored hydrocarbon resources, particularly in cases where unitization is necessary. The book will be of interest to practitioners, scholars, and students in the field of natural resource law, international law, and unitization. *Engineering and Mining Journal*, 1911 *Engineering and Mining Journal*, 1914 **Bioremediation and Bioeconomy** Majeti Narasimha Vara Prasad, 2023-11-23 Bioremediation and Bioeconomy: A Circular Economy Approach provides a common platform for scientists from various backgrounds to find sustainable solutions to environmental issues, including remediation of emerging pollutants, usage of contaminated land, and wastewater for bioproducts such as natural fibers, biocomposites, and fuels to boost the economy. The need for transitioning to a sustainable use of natural resources is now more evident than ever, as industrialization and pollution are global phenomena. Biodiversity is being used as raw material for environmental decontamination, and this field has grown phenomenally in recent years, having emerged less than 3 decades ago. On the other hand, the volume of contaminated substrates (water, soil, and air) is increasing due to anthropogenic and technogenic sources of organic and inorganic contaminants. Bioremediation and Bioeconomy: A Circular Economy Approach will address the bottlenecks and solutions to the existing limitations in field scale and the relevant techniques. Provides a compilation of new information on bioremediation not found in other books in the present market. Presents the link between bioremediation, bioeconomy, and the circular economy. Includes strategies for using contaminated substrates for producing bioresources and co-generation of value chain and value addition products.

Reading Victorian Deafness Jennifer Esmail, 2013-04-15 Reading Victorian Deafness is the first book to address the crucial role that deaf people and their unique language of signs played in Victorian culture. Drawing on a range of works from fiction by Charles Dickens and Wilkie Collins to poetry by deaf poets and life writing by deaf memoirists Harriet Martineau and John Kitto to scientific treatises by Alexander Graham Bell and Francis Galton, Reading Victorian Deafness argues that deaf people's language use was a public, influential, and contentious issue in Victorian Britain. The Victorians understood signed languages in multiple and often contradictory ways; they were objects of fascination and revulsion, were of scientific import and literary interest, and were considered both a unique mode of human communication and a vestige of a bestial heritage. Over the course of the nineteenth century, deaf people were increasingly stripped of their linguistic and cultural

rights by a widespread pedagogical and cultural movement known as oralism comprising mainly hearing educators physicians and parents Engaging with a group of human beings who used signs instead of speech challenged the Victorian understanding of humans as the speaking animal and the widespread understanding of language as a product of the voice It is here that Reading Victorian Deafness offers substantial contributions to the fields of Victorian studies and disability studies This book expands current scholarly conversations around orality textuality and sound while demonstrating how understandings of disability contributed to Victorian constructions of normalcy Reading Victorian Deafness argues that deaf people were used as material test subjects for the Victorian process of understanding human language and by extension the definition of the human
