Marijuana Potency Michael Starks, 1977 **Marijuana and Madness** Deepak Cyril D'Souza, David Castle, Sir Robin Murray, 2023-06-01 An updated third edition of this award winning book provides a comprehensive overview of the complex associations between cannabis and mental illness Organised into easy to navigate sections the book has been fully revised to feature eight entirely new chapters covering important novel aspects Marijuana and Madness incorporates new research findings on the potential use of cannabinoids and synthetic cannabinoids in an array of mental illnesses balanced against the potential adverse effects The associations between cannabis and psychosis developing putative models of cannabis induced psychosis and pathways to schizophrenia are all covered The book importantly discusses the impact of exposure to cannabis at various stages of neurodevelopment in utero in childhood and during adolescence and it thoroughly reviews the treatments for cannabis dependence and health policy implications of the availability of increasingly high potency cannabis This book will quickly become an essential resource for all members of the mental health team *Psychological Aspects of Cannabis Use and Cannabis Use Disorder* Daniel Feingold, Eva Hoch, Aviv M. Weinstein, Wayne Denis Hall, 2022-01-05 *An Overview of Cannabis Potency in Europe* Leslie A. King, Chloé Carpentier, Paul Griffiths, European Monitoring Centre for Drugs and Drug Addiction, 2004 Recoge 1 Introduction 2 Analytical aspects 3 Trends in cannabis potency in Europe 4 The cannabis market in Europe 5 Trends in cannabis potency in other countries 6 Identification on informatin gaps priorities for future research and recommendations **National Drug Threat Assessment 2008** Barry Leonard, 2009-11 This assessment by the National Drug Intelligence Center provides a strategic overview and predictive outlook of drug trafficking and abuse trends within the U S The assessment identifies the primary drug threats to the nation tracks drug availability throughout the country and analyzes trafficking and distribution patterns of illicit drugs within the U S It evaluates the threat posed by illegal drugs by examining availability production and cultivation transportation distribution and demand Extensive maps charts and tables **Medical Marijuana and Marijuana Use** Albert T. Johnson, 2009 Twelve states mostly in the West have enacted laws allowing the use of marijuana for medical purposes and many thousands of patients are seeking relief from a variety of serious illnesses by smoking marijuana or using other herbal cannabis preparations Meanwhile the federal Drug Enforcement Administration refuses to recognise these state laws and continues to investigate and arrest under federal statute medical marijuana providers and users in those states and elsewhere Claims and counterclaims about medical marijuana much debated by journalists and academics policymakers at all levels of government and interested citizens include the following Marijuana is harmful and has no medical value marijuana effectively treats the symptoms of certain diseases smoking is an improper route of drug administration marijuana should be rescheduled to permit medical use state medical marijuana laws send the wrong message and lead to increased illicit drug use the medical marijuana movement undermines the war on drugs patients should not be arrested for using medical marijuana the federal government should

allow the states to experiment and should not interfere with state medical marijuana programs medical marijuana laws harm the federal drug approval process the medical cannabis movement is a cynical ploy to legalise marijuana and other drugs With strong opinions being expressed on all sides of this complex issue the debate over medical marijuana does not appear to be approaching resolution

Marijuana Mark Kleiman, 1989-06-26 A timely tightly reasoned thought provoking examination of ways to select policies for the enforcement of federal marijuana drug laws Choice Mark Kleiman has written a thorough analysis of federal law enforcement policy options regarding marijuana The genesis of this work began when he worked as a policy analyst with the U S Department of Justice Kleiman presents a number of major arguments against increased federal enforcement of laws prohibiting marijuana including that it would 1 increase the use of other drugs such as PCP and alcohol 2 increase drug dealing and theft among adolescent users and 3 increase the involvement of organized crime in the illicit distribution and sale of marijuana due to the attraction of greater profits Regarding this last item he argues that as enforcement efforts increase it gives people with a propensity for using violence and corruption a competitive advantage in the marijuana trade Because Kleiman argues for a severe curtailment of federal law enforcement efforts against marijuana it will stimulate the debate about the role of federal law with regard to marijuana Journal of Contemporary Criminal Justice How and how vigorously should U S federal law enforcement agencies enforce the laws against dealing in marijuana This book assesses alternative ways of enforcing marijuana laws at the federal level Marijuana grew out of work begun by Kleiman in 1981 1982 when as a drug policy analyst for the Department of Justice he was trying to calculate how an increase in enforcement resources would serve the twin goals of reducing drug abuse and limiting the power and wealth of large criminal organizations This volume reproduces that analysis using newer data and compares results up to 1985 1986 with expectations It is intended not to second guess what was done but to suggest how such choices ought to be made in the future Kleiman divides his analysis into three parts First he identifies what is at stake in marijuana consumption and dealing estimates the size of the problem and discusses the criteria to be used in judging a policy recommendation The second part is devoted to developing a theory of drug dealing and its response to varying levels of enforcement pressure The remainder of the book applies that theory to the real world and discusses the policy options available now Kleiman s conclusions are pessimistic about the ability of federal enforcement to influence marijuana consumption His analysis supports both a reduction in federal marijuana enforcement efforts and a redirection towards the most violent dealing groups As a study of a critical problem in contemporary American society and as a work of policy analysis Marijuana will be challenging reading for political scientists economists policy analysts and members of those agencies dealing with drug law enforcement The serious general reader also will find it thought provoking

Increased Cannabinoids Concentrations Found in Specimens from Fatal Aviation Accidents

Between 1997 and 2006 Dennis V. Canfield, 2009 The Civil Aerospace Medical Institute's toxicology laboratory receives biological specimens from more than 90% of all fatal aviation accidents that occur in the United States and its territories. As a part of the routine analysis of pilot specimens, the laboratory tests all cases for the presence of marijuana. The National Institute on Drug Abuse (NIDA) and the Office of National Drug Control Policy (ONDCP) reported a 1.5 fold increase in the delta-9 tetrahydrocannabinol (THC) content of street cannabis seizures from 1997-2001 to 2002-2006. This study was conducted to compare the changes over those years in blood and urine cannabinoid concentrations with the potency of THC reported in the cannabis plant. In our laboratory, cannabinoids are screened using radioimmunoassay (RIA) for blood and fluorescence polarization immunoassay (FPIA) for urine and confirmed using GC/MS. A total of 95 individuals were found to be using cannabis from a total number of 2769; 3.4% individuals tested over the period 1997 through 2006. Blood was received for analysis from 1676 fatally injured individuals. Urine was received for analyses from 1650 fatalities. Cannabinoids were found in 88 of the 1676 (5.3%) blood specimens received for analysis and 64 of the 88 were from pilots. Cannabinoids were found in 68 of the 1650 (4.1%) urine specimens received for analysis and 57 of the 68 were from pilots. Other impairing drugs were found in 39% of the cannabinoids positive individuals. Page i

California. Court of Appeal (3rd Appellate District). Records and Briefs California (State)., **Marijuana and Youth** Rosalie Liccardo Pacula, 2000. This paper contains the first estimates of the price sensitivity of the prevalence of youth marijuana use. Survey data on marijuana use by high school seniors from the Monitoring the Future Project are combined with data on marijuana prices and potency from the Drug Enforcement Administration Office of Intelligence or Intelligence Division. Our estimates of the price elasticity of annual

marijuana participation range from 0.06 to 0.47 while those for thirty day participation range from 0.002 to 0.69. These estimates clearly imply that changes in the real quality adjusted price of marijuana contributed significantly to the trends in youth marijuana use between 1982 and 1998, particularly during the contraction in use from 1982 to 1992. Similarly, changes in youth perceptions of the harms associated with regular marijuana use had a substantial impact on both the contraction in use during the 1982 through 1992 period and the subsequent expansion in use after 1992. These findings underscore the usefulness of considering price in addition to more traditional determinants in any analysis of marijuana consumption decisions made by youths.
