Pair Programming Illuminated Laurie Williams,Robert R. Kessler,2003 Written as instruction for pair programming newbies with practical improvement tips for those experienced with the concept this guide explores the operational aspects and unique fundamentals of pair programming information such as furniture set up pair rotation and weeding out bad pairs

Extreme Programming Refactored Don Rosenberg,Matt Stephens,2008-01-01 Extreme Programming Refactored The Case Against XP featuring Songs of the Extremos takes a satirical look at the increasingly hyped extreme programming XP methodology It explores some quite astonishing Extremo quotes that have typified the XP approach quotes such as XPers are not afraid of oral documentation Schedule is the customer s problem Dependencies between requirements are more a matter of fear than reality and Concentration is the enemy In between the chuckles though there is a serious analysis of XP s many flaws The authors also examine C3 the first XP project whose team most of whom went on to get XP book deals shortly before C3 s cancellation described themselves as the best team on the face of the Earth In a later chapter the authors also note that one problem which can affect pair programmers is overconfidence or is that eXcessive courage The authors examine whether the problems that led to C3 s inexplicable cancellation could also afflict present day XP projects In the final chapter Refactoring XP Matt and Doug suggest some ways of achieving the agile goals of XP using some XP practices used in moderation combined with other less risk laden methods   The Search for Meaning at Work Steve Van Valin,2022-11-01 Offers a path to purpose and meaning at work to engage and support employees at every level While recent studies have shown that companies with high levels of employee engagement have 40% less turnover half the absenteeism rate and double the net profit compared to companies with low engagement many firms continue to struggle with engaging their employees and a mass exodus in under way Business leaders are unprepared to deliver the type of culture and leadership that infuses the work experience of their employees with purpose and meaning No surprise that a recent Gallup survey showed that only 15% of employees consider themselves engaged in their work In The Search for Meaning at Work Steve Van Valin an organizational culture consultant and former long time executive with QVC provides talent leaders and managers at all levels with a focused awareness and a robust set of actionable tools to meet the talent challenge head on Building on the research of Harvard professor Dr Teresa Amabile and others Van Valin s model is based on eleven Amplifiers of Meaning that identify and describe the core purpose that gives work meaning Without purpose there is no meaning Van Valin argues and without meaning there is no true engagement For many employees and their managers the purpose that drives an employee s motivation to work remains hidden as a result employees are disengaged leaving managers and leaders frustrated as they search for answers Van Valin s approach is a confident and creative challenge to leaders to think differently with greater empathy for the power of purpose and meaning in people s lives Each chapter contains personal observations revealing anecdotes and a playbook which provides specific and relevant actions steps the reader can follow to

amplify meaning in ways that inspire high performance 1 The book is anchored on providing specific actionable ideas to promote purpose and meaning It is a practical guide not just a philosophical work on a lofty subject 2 No other book fully defines purpose and meaning and brings to light the dynamics between them Doing so provides a high level of awareness for the reader that leads to the practical application of emotional intelligence when making the everyday better choices 3 The book research model and actionable ideas are directly transferable as content for teaching the Amplify concept via classroom online and webinar delivery **Encyclopedia of Software Engineering Three-Volume Set (Print)** Phillip A. Laplante,2010-11-22 Software engineering requires specialized knowledge of a broad spectrum of topics including the construction of software and the platforms applications and environments in which the software operates as well as an understanding of the people who build and use the software Offering an authoritative perspective the two volumes of the Encyclopedia of Software Engineering cover the entire multidisciplinary scope of this important field More than 200 expert contributors and reviewers from industry and academia across 21 countries provide easy to read entries that cover software requirements design construction testing maintenance configuration management quality control and software engineering management tools and methods Editor Phillip A Laplante uses the most universally recognized definition of the areas of relevance to software engineering the Software Engineering Body of Knowledge SWEBOK as a template for organizing the material Also available in an electronic format this encyclopedia supplies software engineering students IT professionals researchers managers and scholars with unrivaled coverage of the topics that encompass this ever changing field Also Available Online This Taylor E mail e reference taylorandfrancis com International Tel 44 0 20 7017 6062 E mail online sales tandf co uk Agile Performance Improvement Robert Winter,2015-05-11 1 1 3 That is the equation that summarizes the theme of this book The book s message is to integrate the developmental principles of Agile with the result focused approaches integral to performance consulting Your outcomes in shaping human performance will be significant and greater than if you only used one of these models This is a book for anyone who seeks to work collaboratively with leaders to bring about continuously improving and sustainable organizational change Dana Gaines Robinson coauthor of Performance Consulting Agile Performance Improvement demonstrates the mutual benefits that accrue to the worlds of performance consulting and agile software development when the values and principles of both are blended synergistically under the guidance of practitioners skilled in both The agile performance improvement model blends the principles of human performance technology with the frameworks and practices of Agile The resultis an approach that maximizes the value of interactions among the consultant the work team and the customer Unlike traditional end to end waterfall processes agile performance improvement delivers value continuously and in small increments relentlessly focusing on outcomes of value to the customer Building on structures of Agile that are used in software development such as Scrum the agile performance improvement model considers the human component of holistic solutions in establishing a continuous stream of value Bob

Winter a performance consultant was the product owner for the corporate education scrum supporting an agile transition initiative for hundreds of engineering teams From this cross disciplinary experience he discovered that the two cultures two languages and two methodologies of performance consulting and agile software development are far from being incongruent incompatible or irrelevant to each other in fact ideally suited to complement and support each other Being agile improves the effectiveness of the performance consultant and applying the lessons of human performance technology improves the effectiveness of software development teams In Agile Performance Improvement Winter teaches performance consultants how to apply agile principles values and methods usefully to the tasks of optimizing human performance in areas of practice not only adjoining but also well beyond the realm of software and IT engineering such as corporate learning solutions human resources systems and non software products Conversely he shows engineering teams immersed in an agile environment how to boost their performance using the principles and techniques taught and cultivated by performance consultants The author who has worked extensively on both sides of the traditional divide recounts entertainingly but informatively how both sparks and fur can fly when geeks encounter people people   Artificial Intelligence in HCI Helmut Degen,Stavroula Ntoa,2021-07-03 This book constitutes the refereed proceedings of the Second International Conference on Artificial Intelligence in HCI AI HCI 2021 which was held as part of HCI International 2021 and took place virtually during July 24 29 2021 The total of 1276 papers and 241 posters included in the 39 HCII 2021 proceedings volumes was carefully reviewed and selected from 5222 submissions The papers included in this volume were organized in topical sections as follows Ethics trust and explainability human centered AI AI applications in HCI and AI applications in smart environments   Making Software Andy Oram,Greg Wilson,2010-10-14 Many claims are made about how certain tools technologies and practices improve software development But which claims are verifiable and which are merely wishful thinking In this book leading thinkers such as Steve McConnell Barry Boehm and Barbara Kitchenham offer essays that uncover the truth and unmask myths commonly held among the software development community Their insights may surprise you Are some programmers really ten times more productive than others Does writing tests first help you develop better code faster Can code metrics predict the number of bugs in a piece of software Do design patterns actually make better software What effect does personality have on pair programming What matters more how far apart people are geographically or how far apart they are in the org chart Contributors include Jorge Aranda Tom Ball Victor R Basili Andrew Begel Christian Bird Barry Boehm Marcelo Cataldo Steven Clarke Jason Cohen Robert DeLine Madeline Diep Hakan Erdogmus Michael Godfrey Mark Guzdial Jo E Hannay Ahmed E Hassan Israel Herraiz Kim Sebastian Herzig Cory Kapser Barbara Kitchenham Andrew Ko Lucas Layman Steve McConnell Tim Menzies Gail Murphy Nachi Nagappan Thomas J Ostrand Dewayne Perry Marian Petre Lutz Prechelt Rahul Premraj Forrest Shull Beth Simon Diomidis Spinellis Neil Thomas Walter Tichy Burak Turhan Elaine J Weyuker Michele A Whitecraft Laurie Williams Wendy M Williams Andreas Zeller Thomas Zimmermann   Empirical Studies of Distributed Pair
