The purpose of the meeting was to discuss guidelines for fertility change proposed by the Division for use in intermediate fertility countries defined as countries with total fertility between 2.1 and 5 children per woman in 1995-2000. The Population Division uses fertility guidelines to prepare the official United Nations population projections for every country and region in the world. Until recently the guidelines stipulated that fertility in intermediate fertility countries would not fall below replacement level by 2050.
