Pakistan's Nuclear Policy Savita Pande,1991 **Pakistan's Nuclear Policy** Zafar Khan,2014-07-17 In May 1998 in reaction to India s nuclear weapons tests Pakistan tested six nuclear weapons Following this the country opted for a policy of minimum deterrence and within a year Pakistan had altered its policy stance by adding the modifier of minimum credible deterrence This book looks at how this seemingly innocuous shift seriously impacted on Pakistan s nuclear policy direction and whether the concept of minimum has lost its significance in the South Asian region s changed changing strategic environment After providing a brief historical background exploring why and how Pakistan carried out the nuclear development program the book questions why Pakistan could not sustain the minimum deterrence that it had conceptualized in the immediate aftermath of the 1998 test It examines the conceptual theoretical framework of the essentials of minimum deterrence in order to question whether Pakistan s nuclear policy remained consistent with this as well as to discover the rudimentary factors that are responsible for the inconsistencies with regard to minimum deterrence conceived in this study The book goes on to look at the policy options that Pakistan had after acquiring the nuclear capability and what the rationale was for selecting minimum deterrence The book not only highlights Pakistan deterrent force building but also analyzes closely Pakistan s doctrinal posture of first use option Furthermore it examines the policy towards arms control and disarmament and discusses whether these individual policy orientations are consistent with the minimum deterrence Conceptually providing a deeper understanding of Pakistan s post 1998 nuclear policy this book critically examines whether the minimum deterrence conceived could be sustained both at the theoretical and operational levels It will be a useful contribution in the field of Nuclear Policy Security Studies Asian Politics Proliferation Non Proliferation Studies and Peace Studies This book will be of interest to policy makers scholars and students of nuclear policy nuclear proliferation and arms control related research *Pakistan's Nuclear Policy* Zafar Khan,2014-07-17 In May 1998 in reaction to India s nuclear weapons tests Pakistan tested six nuclear weapons Following this the country opted for a policy of minimum deterrence and within a year Pakistan had altered its policy stance by adding the modifier of minimum credible deterrence This book looks at how this seemingly innocuous shift seriously impacted on Pakistan s nuclear policy direction and whether the concept of minimum has lost its significance in the South Asian region s changed changing strategic environment After providing a brief historical background exploring why and how Pakistan carried out the nuclear development program the book questions why Pakistan could not sustain the minimum deterrence that it had conceptualized in the immediate aftermath of the 1998 test It examines the conceptual theoretical framework of the essentials of minimum deterrence in order to question whether Pakistan s nuclear policy remained consistent with this as well as to discover the rudimentary factors that are responsible for the inconsistencies with regard to minimum deterrence conceived in this study The book goes on to look at the policy options that Pakistan had after acquiring the nuclear capability and what the rationale was for selecting minimum deterrence The

book not only highlights Pakistan deterrent force building but also analyzes closely Pakistan's doctrinal posture of first use option. Furthermore, it examines the policy towards arms control and disarmament and discusses whether these individual policy orientations are consistent with the minimum deterrence. Conceptually providing a deeper understanding of Pakistan's post 1998 nuclear policy, this book critically examines whether the minimum deterrence conceived could be sustained both at the theoretical and operational levels. It will be a useful contribution in the field of Nuclear Policy, Security Studies, Asian Politics, Proliferation, Non-Proliferation Studies and Peace Studies. This book will be of interest to policy makers, scholars and students of nuclear policy, nuclear proliferation and arms control related research. Democratic Transition and Security in Pakistan Shaun Gregory, 2015-10-23. This volume examines the trajectory of Pakistan's democratic transition and the implications of this change for its security. In May 2013, for the first time in its 66-year history, Pakistan saw an elected government complete a full term in office and transfer power through the ballot box to another civilian government. At this important moment in Pakistan's history, this collection brings together twelve leading academics and writers with an aim to provide a far-reaching analysis of the current situation in Pakistan and emergent trends. Drawing on history, diverse theoretical perspectives and empirical evidence, three themed sections deal respectively with democratic transition including Islam and democracy, civil-military relations and economics, contested borders and contested spaces, the Pashtun belt, Kashmir and intra-Islamic conflict and regionalism, bilateral relations from both Pakistani and Indian perspectives, US-Pakistan relations and nuclear weapons dynamics. Together, the contributors explore the status of Pakistan's democratic transition, contemporary security dynamics and wider regional security and political dynamics and the complex interplay of the three to provide a wide-ranging analysis of Pakistan's contemporary national and regional challenges, its impact on the region and evidence of some positive trends for Pakistan's future. The book will be of much interest to students of South Asian politics, Asian security, governance and IR in general as well as policy makers, diplomats and military professionals. Pakistan and the Bomb Samina Ahmed, David Cortright, 1998. Pakistan and the Bomb democratizes the debate over nuclear weapons in South Asia by highlighting a new generation of young Pakistani authors. The chapters in the book examine the nuclear policy choices facing Pakistan from nuclear abstinence to outright weaponization and apply the findings of the public opinion poll to evaluate a level of popular support for each option. **Pakistan's Nuclear Weapons** Bhumitra Chakma, 2012-10-12. Pakistan is a vitally important country in the contemporary global political system. It is a de facto nuclear state and a pivotal country in the War on Terror. This book provides a comprehensive study of a nuclear-armed Pakistan, investigating the implications of its emergence as a nuclear weapons state. Setting out the historical background of Pakistani nuclear development, the book examines the lessons for proliferation that can be drawn from the Pakistan case. It explains the changes and continuities of Pakistan's nuclear policy, assessing its emerging force posture and the implications for Pakistani, South Asian and global security. It also considers the extent to which Pakistan can be said to have a nuclear doctrine, the

Pakistani nuclear command and control system and the relationship between Pakistan and the Non Proliferation regime Addressing the issue of whether Pakistan should be viewed as a proliferator and the implications of a nuclear Pakistan for global terrorism Pakistan's Nuclear Weapons is an important study of all the major issues surrounding Pakistan's emergence as a nuclear power

Pakistan's Nuclear Disorder Garima Singh, 2006 Non proliferation concerns have often been shrugged off by nations for short term and short sighted strategic interests The present relationship between Pakistan and the US is a case in point Though a member of the NPT coupled with non proliferation as its foreign policy the US has been turning a blind eye to Pakistan's long and avid quest for nuclear weapons primarily to serve its own short term strategic interests in the region Pakistan well aware of this has exploited the situation to full The focus of this work is to determine whether the Western experts apprehensions on the safety and security of Pakistan's nuclear installations and fissile material are well founded or an exaggeration The decades old nuclear trade between Pakistan and other countries has also been discussed with a view to highlighting the fact that A Q Khan's proliferation linkages did not come as a surprise to the US emphasizing the point that Washington had been turning a blind eye to the nuclear linkages and programmes for its own strategic interests The study also holds that NPT has been unsuccessful in controlling nuclear proliferation and suggests ways to curb further proliferation

Pakistan's Nuclear Weapons Paul K. Kerr, Mary Beth Dunham Nikitin, 2007 Pakistan's nuclear arsenal consists of approximately 60 nuclear warheads Pakistan continues fissile material production for weapons and is adding to its weapons production facilities and delivery vehicles Pakistan reportedly stores its warheads unassembled with the fissile core separate from non nuclear explosives and these are stored separately from their delivery vehicles Pakistan does not have a stated nuclear policy but its minimum credible deterrent is thought to be primarily a deterrent to Indian military action Command and control structures have been dramatically overhauled since September 11 2001 and export controls and personnel security programs have been put in place since the 2004 revelations about Pakistan's top nuclear scientists A Q Khan's international proliferation network Pakistani and some U S officials argue that Islamabad has taken a number of steps to prevent further proliferation of nuclear related technologies and materials and improve its nuclear security A number of important initiatives such as strengthened export control laws improved personnel security and international nuclear security cooperation programs have improved the security situation in recent years Current instability in Pakistan has called the extent and durability of these reforms into question Some observers fear radical takeover of a government that possesses a nuclear bomb or proliferation by radical sympathizers within Pakistan's nuclear complex in case of a breakdown of controls While U S and Pakistani officials express confidence in controls over Pakistan's nuclear weapons it is uncertain what impact continued instability in the country will have on these safeguards For a broader discussion see CRS Report RL33498 Pakistan U S Relations by K Alan Kronstadt This
