## **Metaphysics Of Hyperspace:**

**The Metaphysics of Hyperspace** Hud Hudson, 2005-11-24 Hud Hudson offers a fascinating examination of philosophical reasons to believe in hyperspace. He begins with some stage setting discussions offering his analysis of the term material object, noting his adherence to substantivalism, confessing his sympathies regarding principles of composition and decomposition, identifying his views on material simples, material gunk, and the persistence of material objects, and preparing the reader for later discussions with introductory remarks on eternalism, modality, and recombination, vagueness, bruteness, and the epistemic role of intuitions. The subsequent chapters are loosely organized around the theme of hyperspace. Hudson explores nontheistic reasons to believe in hyperspace in chapter 1, e.g., reasons arising from reflection on incongruent counterparts and fine tuning arguments; theistic reasons in chapter 7, e.g., reasons arising from reflection on theistic puzzles known as the problem of the best and the problem of evil, and some distinctively Christian reasons in chapter 8, e.g., reasons arising from reflection on traditional Christian themes such as heaven and hell, the Garden of Eden, angels and demons, and new testament miracles. In the intervening chapters, Hudson inquires into a variety of puzzles in the metaphysics of material objects that are either generated by the hypothesis of hyperspace, focusing on the topics of mirror determinism and mirror incompatibilism, or else informed by the hypothesis of hyperspace, with discussions of receptacles, boundaries, contact, occupation, and superluminal motion. Anyone engaged with contemporary metaphysics will find much to stimulate them here.

*The Fall and Hypertime* Hud Hudson, 2014-06-26 Frequently alleged irreconcilable conflicts between science and religion are instead misdescribed battles concerning negotiable philosophical assumptions. Conflicts between metaphysics and metaphysics. Hud Hudson provides a two stage illustration of this claim with respect to the putative inconsistency between the doctrines of The Fall and Original Sin and the deliverances of contemporary science. The tension in question emerges through a study of the many forms the religious doctrines have assumed over the centuries, and through a review of some well established scientific lessons on the origin and history of the universe and of human persons. The first stage: After surveying various paths of retreat which involve reinterpreting and impoverishing Original Sin and minimizing and dehistoricizing The Fall, one version of moderate realism about the doctrines is articulated, critically evaluated, and found both consistent with contemporary science and suitable to play a crucial role in the theist's confrontation with the Problem of Evil. The second stage: Recent work in the philosophy of time and in the philosophy of religion provides intriguing support for a Hypertime Hypothesis, a species of multiverse hypothesis distinctive for positing a series of successive hypertimes, each of which hosts a spacetime block. After arguing that the Hypertime Hypothesis is a genuine epistemic possibility and critically discussing its impact on a number of debates in metaphysics and philosophy of religion, Hudson reveals a strategy for unabashed extreme literalism concerning The Fall and Original Sin, which nevertheless has the extraordinary and delightful feature of being thoroughly consistent with the reigning scientific orthodoxy. *Personal Identity and Resurrection* Georg

Gasser,2016-09-17 What happens to us when we die According to Christian faith we will rise again bodily from the dead This claim raises a series of philosophical and theological conundrums is it rational to hope for life after death in bodily form Will it truly be we who are raised again or will it be post mortem duplicates of us How can personal identity be secured What is God's role in resurrection and everlasting life In response to these conundrums this book presents the first ever joint work of leading philosophers and theologians on life after death This is an impressive demonstration of interdisciplinary cooperation between philosophy and theology Various models are offered which depict what resurrection into an incorruptible post mortem body might look like Therefore this book is an indispensable resource for anyone interested in the doctrine of bodily resurrection be they philosophers theologians scholars in religious studies or believers interested in examining their faith
