Strategies Of Digitalization And Sustainability In Agrifood Value Chains Isabelle Piot-Lepetit, Fatima El Hadad-Gauthier, 2025-03-04 Nowadays stakeholders of agrifood value chains are developing specific strategies regarding their sustainable transformations supported by digital technologies. These strategies are designing new activities within and outside the whole value chains and in each of their specific segments such as raw products supplies and machinery production transformation transportation and logistics distribution retail and consumption. The strategies developed by agrifood stakeholders related to the digitalization for more sustainability of their practices and activities are changing the way stakeholders are interacting and fuel in one way or another new reconfigurations of value chains. Most often sustainability initiatives explore new value added activities goods and services while digital initiatives acknowledge the opportunities resulting from the use of digital solutions such as sensors the Internet of Things e commerce platforms blockchain or robots and advanced data analytics based on big data cloud computing technologies or artificial intelligence applications. Digital and sustainable transformations have been explored in the literature for some time now by considering either the changes involved in farms companies and business activities or the necessary adjustments of the economic and regulatory environments. However the setting up of strategies related to the digitalization for sustainable agrifood value chains has not often been investigated.

Creating and Promoting Lifelong Learning in Public Libraries Donna L. Gilton, 2016-06-21. *Creating and Promoting Lifelong Learning in Public Libraries: Tools and Tips For Practitioners* is the sequel to *Lifelong Learning in Public Libraries: Principles, Programs, and People*. On the one hand, *Lifelong Learning in Public Libraries* focuses on the information needs and the developmental and psychological characteristics of diverse library users of all ages. It endorses the use of ILI to promote lifelong learning in public libraries both by borrowing techniques from academic and school libraries and by building on existing public library traditions of programming and outreach. This book also compares lifelong learning in public libraries to informal and nonformal education in museums, community organizations, and agencies, places of worship, and other organizations. In addition, *Lifelong Learning in Public Libraries* describes basic steps that librarians can execute in order to get started. On the other hand, *Creating and Promoting Lifelong Learning in Public Libraries* focuses much more on how public librarians can specifically plan and implement their instruction, with chapters on planning for instruction using teaching methodologies, teaching with and about technology, and bringing ILI together with more traditional public library services, programming, and activities such as reference and Readers Advisory services, bibliotherapy, and cultural and literacy programming. Changes in ILI standards and comparisons of ILI with basic reading, media, digital, and cultural literacies are also described. Both books together should act as basic manuals for public librarians who promote lifelong learning. *Creating and Promoting Lifelong Learning in Public Libraries* also have helpful teaching hints for all librarians and other professionals who teach in a variety of settings.

Welcome to Cyberschool is a book about two highly charged and often emotional discussions in today's society. One concerns the optimism and promise surrounding information technologies of computers and the Internet; the other involves the growing pessimism and despair about the nation's schools.

These narratives of technological optimism and educational pessimism converge with increasing frequency as school groups, community leaders, and political rivals battle each other over the best way to wire the nation's schools, computerize every classroom, and leave no child behind. Welcome to Cyberschool is the first book-length analysis of this confluence of technology and education in the information age. *Strategies for Digital Literacy Professional Development* Amy C.
