Rethinking Meredith Monk Tracy Monaghan, 2020 Meredith Monk s decades of work embody an interdisciplinary art that exists at the intersection of sonic visual and kinesthetic artistic media To date scholars and critics of music and dance have only studied aspects of her work in isolation and have tended to omit the other critical aspects of Monk s compositional language For example music scholars omit analysis of movement in their analyses while dance scholars omit musical analyses This has led to inappropriate categorization of her work particularly into the vein of minimalism My project represents the most in depth study of all aspects of Monk s music to date by analyzing musical visual and stylistic facets of her work The project also considers Monk s work alongside social philosophies and will argue that Monk scrutinizes gender and embodied voice in order to challenge socially constructed gender norms
