Metaphonological Awareness

Phase 1: Correspondences are established between linguistic forms and their pragmatic contexts.

Phase 2: Unconscious organisation of phonological aspects of Phase 1 knowledge as part of normal language development.

Phase 3 (optional): An external demand (e.g. literacy acquisition) is necessary to stimulate conscious awareness of elements of the epiphonological organisation.

Metalinguistic Development

David T. Hakes

Metalinguistic Development:

Metalinguistic Development Jean Émile Gombert, 1992-08 This book reviews and analyzes what is known about metacognitive processes in relation to language Each of its seven chapters deals systematically with the relationship between the comprehension and production of the phonetic syntactic semantic pragmatic and textual aspects of language This material is then related to the metacognitive principles which govern reflective awareness A concluding chapter deals with written language and metalinguistics From publisher's description

Metalinguistic Development Jean Émile Gombert, 1992-08-01 At a very early age the child is able to use and understand language correctly Later comes the precocious ability to reflect upon and deliberately control its use Metalinguistic development or the emergence of a reflective attitude to the comprehension and production of oral and written language must be distinguished from that of ordinary verbal communication This is the first book to review and analyze what is known about metacognitive processes in relation to language Each of its seven chapters deals systematically with the relationship between the comprehension and production of the phonetic syntactic semantic pragmatic and textual aspects of language This material is then related to the metacognitive principles which govern reflective awareness A concluding chapter deals with written language and metalinguistics Jean mile Gombert's novel description of processes such as the understanding of metaphor and humor in relation to pragmatics and his suggestion that metalinguistic knowledge is intimately connected with literacy contribute to a fuller understanding of the stages of language acquisition and mastery With clarity and insight Metalinguistic Development reveals how the capacity for reflection gives rise to emergent properties of the language system A clear critical and interesting book about an important topic which has not been reviewed properly before I particularly like the way that Jean Eacute mile Gombert combines a comprehensive account of American work with a very impressive knowledge of European work Peter Bryant University of Oxford Jean mile Gombert teaches genetic psychology at the University of Dijon

The Development of Metalinguistic Abilities in Children David T. Hakes, 2012-12-06 Not very many years ago it was common for language researchers and theorists to argue that language development was somehow special and separate from other aspects of development It was a period when the 1 little 1 inguist view of language development was common and much discussion was devoted to develop mental linguistic universals in contrast to more broadly defined cognitive universals It seemed to me at the time and still does that such views reflected more their promulgators ignorance of those aspects of cognitive development most likely to provide illuminating parallels with language development than they did the true developmental state of affairs Coming from a neo Piagetian frame of reference it seemed to me that there were striking parallels between the development of children's language comprehension abilities and the cognitive developmental changes occurring contemporaneously largely during the period Piaget characterized as the preoperational stage And though more difficult to see even now there appeared also to be developmentally earlier parallels during the sensory motor stage

The Development of Metalinguistic Awareness in

Children and Its Relationship to Cognitive and Linguistic Development Karen Saywitz, 1979 *Morphological Aspects of Language Processing* Laurie Beth Feldman, 1995 First Published in 1994 Routledge is an imprint of Taylor Francis an informa company *Metalinguistic Awareness in Children* W.E. Tunmer, J. Bowey, C. Pratt, R. Grieve, M. Herriman, M. Myhill, A. Nesdale, 2013-03-07 In the past fifteen years there has been a growing interest in the development of children's awareness of language as an object in itself a phenomenon now generally referred to as metalinguistic awareness Until the publication of an earlier volume in the Springer Series in Language and Communication *The Child's Conception of Language* edited by A Sinclair R J Jarvella and W J M Levelt there had been no systematic treatment of metalinguistic awareness The major goal of that volume was to map out the field of study by describing the phenomenon of interest and defining major theoretical issues The aim of the present volume is to present an overview of metalinguistic awareness in children which reflects the current state of research and theory The volume is divided into three major sections The first considers various conceptual and methodological issues that have arisen from efforts to study metalinguistic awareness It addresses such questions as what is metalinguistic awareness when does it begin to emerge and what tasks and procedures can be employed to assess its development in young children The second section critically reviews the research that has been conducted into the four general types of metalinguistic awareness phonological word syntactic and pragmatic awareness In the final section the development of metalinguistic awareness is examined in relation to general cognitive development reading acquisition bilingualism and early childhood education

The Development of Young Children's Metalinguistic Understanding of "letter", "word", and "sentence" Karen Kuelthau Allan, 1979 *Metalinguistic Awareness in Second Language Reading Development* Sihui Echo Ke, Dongbo Zhang, Keiko Koda, 2023-02-23 This Element aims to address the complexity of metalinguistic awareness to achieve a thorough account of its impacts on second language L2 reading development and promote an in depth understanding of the factors regulating the influence of first language L1 metalinguistic awareness on L2 reading It is guided by four questions 1 To what extent do L1 phonological orthographic and morphological awareness correlate with L2 phonological orthographic and morphological awareness in L2 readers 2 To what extent do phonological orthographic and morphological awareness correlate with word decoding intralingually in L2 readers 3 To what extent do L1 phonological orthographic and morphological awareness correlate with L2 word decoding in L2 readers 4 To what extent do the relations in questions 1 3 vary as a function of linguistic learner measurement and instruction related factors This Element is the first to systematically investigate the roles of distinct facets of metalinguistic awareness in L2 reading

The Metalinguistic Mind Sergio Melogno, Maria Antonietta Pinto, 2025-10-01 This book is about metalinguistic awareness MLA a broad area whose relevance has been acknowledged by several disciplines The authors treat the topic from three main perspectives developmental methodological and clinical They begin by outlining the main historical developmental models and the way metalinguistic development is intertwined with such factors as literacy bilingualism

executive function and Theory of Mind They then proceed to consider a series of methodological issues related to the assessment of MLA based on the possible variation of research objectives tools and designs and finally face the metalinguistic challenges experienced by children and adults with neurodevelopmental disorders Throughout the three sections of the book that develop these perspectives a common thread can be recognized which justifies the title The metalinguistic mind By this expression the authors mean a way of reasoning on form content relationships that applies transversally to phonological morphological syntactical semantic and pragmatic aspects of language This process begins at preschool age with active forms of curiosity about forms and meanings of words using explicit language to comment on language often revealing an awareness of conflicts between linguistic forms and showing the need to find consistent solutions to reconcile these linguistic conflicts This argumentative attitude goes much beyond the application of linguistic rules or the use of metalanguage and may manifest itself even when unrequested The authors insist on the conflictual aspect inherent in all metalinguistic tasks Accordingly metalinguistic assessment should point to the consistency with which these conflicts are reconciled on explicit grounds This is where metalinguistic development and methodology can converge on the condition that both researchers and examiners bring to light those capabilities to argue about structural aspects of language Lastly even in the clinical conditions described by the authors despite evident language difficulties recent treatments have shown very interesting possibilities to enhance basic linguistic abilities and promote further improvements toward a meta level This complex interplay between metalinguistic development in typical children assessment methodology and the potentialities that open up in atypical conditions underscores the concept of metalinguistic mind
