Metallocene Based Polyolefins:

Metallocene-based Polyolefins, 2 Volume Set John Scheirs, Walter Kaminsky, 2000-01-21 In the last three years research into the nature and strength of metallocene based materials has exploded This is the first and only book to provide comprehensive coverage of the developments and advances in the field by such major polyolefin companies as Dow Exxon and Montell The authors begin with overviews of metallocene catalysis and metallocene based polyolefins then discuss all areas of the technology from applications to end products Metallocene-based Polyolefins John Scheirs, Walter Kaminsky, 2000-01-21 The manufacture of polyolefins by metallocene catalysts represents a revolution in the polymer industry The first patent for a metallocene catalyst was filed in 1980 but it has been the last five years that have seen a dramatic increase in the volume of research into metallocenes and the maturing of metallocene technology With contributions from leading experts from the US Canada Italy Scandinavia Germany and Japan Metallocene based Polyolefins gives comprehensive coverage of all areas of metallocene technology catalyst structure comonomer incorporation polymerization mechanisms and conditions reactor configurations special properties rheological and processing behaviour comparison with conventional polyolefins and fields of application An essential book for plastics engineers polymer chemists physicists materials scientists and all those working in the plastics manufacturing and processing industries

Metallocene-based Polyolefins John Scheirs, Walter Kaminsky, 2000 **Handbook of Polyolefins** Cornelia Vasile, 2000-06-21 A handbook on polyolefins This second edition includes new material on the structure morphology and properties of polyolefin PO synthesis It focuses on synthetic advances the use of additives special coverage of PO blends composites and fibres and surface treatments It also addresses the problem of interfacial and superficial phenomena

Metallocene-Based Polyolefins Preparation, Properties Scheirs, J & Kaminsky, W., *Metallocene Catalyzed Polymers* George M. Benedikt, Brian L. Goodall, 1998-12-31 It has been estimated that within just ten years over half of all polyolefins will be made by using metallocene catalysts This ground breaking volume from PDL brings together for the first time work from dozens of world renowned experts on the subject Fifty chapters of peer reviewed content offer insights into applications in automotive components food packaging insulating films non woven fabrics and medical markets among others

Handbook of Engineering Polymeric Materials P. Cheremisinoff, 1997-07-25 Presenting practical information on new and conventional polymers and products as alternative materials and end use applications this work details technological advancements in high structure plastics and elastomers functionalized materials and their product applications The book also provides a comparison of manufacturing and processing techni **SPE/ANTEC 1997 Proceedings** Spe, 1997-04-22 First published in 1997 Routledge is an imprint of Taylor Francis an informa company *Polyolefins: 50 years after Ziegler and Natta II* Walter Kaminsky, 2013-11-29 Advances in Polymer Science enjoys a longstanding tradition and good reputation in its community Each volume is dedicated to a current topic and each review critically surveys one aspect of that topic to place it

within the context of the volume The volumes typically summarize the significant developments of the last 5 to 10 years and discuss them critically presenting selected examples explaining and illustrating the important principles and bringing together many important references of primary literature On that basis future research directions in the area can be discussed Advances in Polymer Science volumes thus are important references for every polymer scientist as well as for other scientists interested in polymer science as an introduction to a neighboring field or as a compilation of detailed information for the specialist

Olefin Polymerization with Supported Metallocene Catalysts Shreyas Chakravarti, 2000 *Metallocene Technology in Commercial Applications* George Benedikt, 1999-12-31 Second in the Metallocene series from PDL this book focuses on the commercial use and process improvements of resins produced with metallocene single site and other modern catalytic methods Research to broaden the scope of applications and shorten production cycles is presented New and improved polymer blends resulting from the use of new catalysts and improved polymer compatibility are explored as well as new applications becoming possible due to improved and balanced properties Current trends and the latest research from the international scientific and industrial community are presented in this volume Chapters cover use in extrusion film manufacture injection molding foam production fiber spinning composites and new applications Precise testing methods material characterization polymer morphology and crystallization are the focus of another section of the book
