**Abstract:** All We know that metaphysical Poetry came into existence in 17th century during early in the Jacobean age. John Donne in considered one of the most remarkable literary figures and the founder of the metaphysical school of poetry. Metaphysical Poetry was a reaction against the conventional poetry of the spenserians. In the present research paper, I want to explain a beautiful analysis of metaphysical qualities of John Donne poetry. It is real fact that when we read the poetry of Donne was often feel unique qualities from other poets' poetry in it. This unique quality is called metaphysical. We can see the poetry of John Donne full of poetic thought as an argument, Fine conceits, Imaging and logics, obscurity Blending of passion, thoughts and intellectual poetic wit. In the last we can say that John Donne was not a poet of common man, he reveals only his own concept, logics, Passions and theories of dogmatic reassigning.

**Keywords:** Early Jacobean Period, Metaphysical Poetry, Donne's Poetry, Qualities of Donne's Poetry.

1. **Introduction :** John Donne was a renowned poet of his time. He deeply studied about world and religious books. In his poems worldly taste and eternal taste are intermixed. He gave a new turn to style of poetry. His poetry is a reaction against the conventional poetry of the followers of Spenser. A unique description of the emotions and Passions led Donne to be a Metaphysical poet<sup>1-3</sup>. His poetry effects on the metaphysics.
2. **Early Jacobean Period:** It was a period in Britain during the reign of King James I and It was a time of great uncertainty. Two distinct forms of Poetry originated during this period. First, cavalier poets and their poetry. They were Richard Lovelace, Thomas Carew, John Suckling. Second, Metaphysical poetry and Poets. They were John Donne, George Herbert, Abraham Cowley and Andrew Marvell. Donne is called the monarch of wit and father of Mataphysical poetry. He became famous and his greatness mainly rests on the Elegies, The satires, The Anniversaries, songs and Sonnets.
3. **Meaning of Metaphysical Poetry:** Metaphysical word is made with two words. The first word is meta and second word is physical: Meta means "To beyond" and physical means. "Physical nature" so metaphysical means. "To beyond physical "nature" Thus the poetry which is beyond the limits and requirements of Physical nature. That is called metaphysical poetry.
4. **Mataphysical poetry :** It is real fact that Donne was tired with the tradition style of tactsy so he used a new style in his poetry. He used uncommon comparison in his poetry. So his poetry is the result of scholarly mind. Metaphysical poetry has many characteristics as fantastic logics and imagery, conceits', love philosophy, comparisons uncommon and obscurity of language etc.

Yolton, 1967      **Metaphysical Analysis, Revealing in the Process of the Formation of Thought a New Doctrine of Metaphysics. [By John Wood Tombs.]** ANALYSIS., 1846      The Nature of Life Florence Webster, 1922 Examines the nature of life from physical life and nutrition to behavior and sentient life to conscious life and mind to values and spirituality      From Metaphysics to Ethics Frank Jackson, 1998-01-08 Frank Jackson champions the cause of conceptual analysis as central to philosophical inquiry In recent years conceptual analysis has been undervalued and Jackson suggests widely misunderstood he argues that there is nothing especially mysterious about it and a whole range of important questions cannot be productively addressed without it He anchors his argument in discussion of specific philosophical issues starting with the metaphysical doctrine of physicalism and moving on via free will meaning personal identity motion and change to the philosophy of colour and to ethics The significance of different kinds of supervenience theses Kripke and Putnam's work in the philosophy of modality and language and the role of intuitions about possible cases received detailed attention Jackson concludes with a defence of a version of analytical descriptivism in ethics In this way the book not only offers a methodological programme for philosophy but also throws fascinating new light on some much debated problems and their interrelations puffs which may be quoted please do not edit without consulting OUP editor This is an outstanding book It covers a vast amount of philosophy in a very short space advances a number of original and striking positions and manages to be both clear and concise in its expositions of other views and forceful in its criticisms of them The book offers something new for those interested in the various individual problems it discusses conceptual analysis the mind body relation secondary qualities modality and ethical realism But unifying these individual discussions is an ambitious structure which amounts to an outline of a complete metaphysical system and an outline of an epistemology for this metaphysics It is hard to think of a central area of analytic philosophy which will not be touched by Jackson's conclusions Tim Crane Reader in Philosophy University College London The writing is clear straightforward and down to earth the usual virtues one expects from Jackson what he has to say is innovative and valuable the book deals with a large number of apparently diverse philosophical issues but it is also an elegantly unified work What gives it unity is the metaphilosophical framework that Jackson works out with great care and persuasiveness This is the first serious and sustained work on the methodology of metaphysics in recent memory What he says about the role of conceptual analysis in metaphysics is an important and timely contribution It is refreshing and heartening to see a first class analytic philosopher doing some serious metaphilosophical work I think that the book will be greeted as an important event in philosophical publishing Jaegwon Kim Professor of Philosophy Brown University      **Metaphysical Analysis** John Jacob Williamson, 1970      **The Nature of Life** Florence Webster, 2018-02-08 Excerpt from The Nature of Life A Study in Metaphysical Analysis The search for this definition will be Conducted empirically and Inductively by an examination of some

of the most significant types of life The choice of instances I trust will be fairly representative and not entirely arbitrary though it does not claim to be complete Various typical selections might be made and the forms of life classified in different ways Plant and animal life are naturally classed as life on the biological or physical plane while at the other extreme the moral and religious life as well as the intellectual and rational are commonly grouped together under the term spiritual personal or inner life Are the esthetic and sensuous the conscious and psychical lives to be included in the same group as the religious and moral as forms of personal or inner life And should the simple and strenuous life business and economic life be included in the same class as well Or should the last two be classed with national and tribal life as forms of group community or social life Many of these evidently have strange and often perplexing likenesses as well as differences About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

Women in the History of Analytic Philosophy Jeanne Peijnenburg, Sander Verhaegh, 2023-01-01 This book contains a selection of papers from the workshop Women in the History of Analytic Philosophy held in October 2019 in Tilburg the Netherlands It is the first volume devoted to the role of women in early analytic philosophy It discusses the ideas of ten female philosophers and covers a period of over a hundred years beginning with the contribution to the Significance Movement by Victoria Lady Welby in the second half of the nineteenth century and ending with Ruth Barcan Marcus's celebrated version of quantified modal logic after the Second World War The book makes clear that women contributed substantially to the development of analytic philosophy in all areas of philosophy from logic epistemology and philosophy of science to ethics metaphysics and philosophy of language It illustrates that although women's voices were no different from men's as regards their scope and versatility they had a much harder time being heard The book is aimed at historians of philosophy and scholars in gender studies

Susan Stebbing and the Language of Common Sense S. Chapman, 2013-03-18 This first book length study of the work and life of L Susan Stebbing relates the development of her thought to the philosophical social and political background of her life It also assesses Stebbing's contribution in the light of developments both in analytic philosophy and in linguistics in the decade since her death

**Analytic Philosophy** Michael Beaney, 2017-11-16 Originating in the pioneering work of Gottlob Frege Bertrand Russell G E Moore and Ludwig Wittgenstein in the four decades around the turn of the twentieth century analytic philosophy established itself in various forms in the 1930s After the Second World War it developed further in North America in the rest of Europe and is now growing in influence as the dominant philosophical tradition right across the world from Latin America to East Asia In this Very Short Introduction Michael Beaney introduces

some of the key ideas of the founders of analytic philosophy by exploring certain fundamental philosophical questions and showing how those ideas can be used in offering answers. Considering the work of Susan Stebbing he also explores the application of analytic philosophy to critical thinking and emphasizes the conceptual creativity that lies at the heart of fruitful analysis. Throughout Beaney illustrates why clarity of thinking, precision of expression and rigour of argumentation are rightly seen as virtues of analytic philosophy.

**ABOUT THE SERIES** The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area. These pocket sized books are the perfect way to get ahead in a new subject quickly. Our expert authors combine facts, analysis, perspective, new ideas and enthusiasm to make interesting and challenging topics highly readable.

**Knowledge First** J. Adam Carter, Emma C. Gordon, Benjamin W. Jarvis, 2017 Knowledge First constitutes what is widely regarded as one of the most significant innovations in contemporary epistemology in the past 25 years. Knowledge first epistemology is the idea that knowledge per se should not be analysed in terms of its constituent parts e.g. justification, belief but rather that these and other notions should be analysed in terms of the concept of knowledge. This volume features a substantive introduction and 13 original essays from leading and up and coming philosophers on the topic of knowledge first philosophy. The contributors' essays range from foundational issues to applications of this project to other disciplines including the philosophy of mind, the philosophy of perception, ethics and action theory.

**Knowledge First Approaches in Epistemology and Mind** aims to provide a relatively open ended forum for creative and original scholarship with the potential to contribute and advance debates connected with this philosophical project.

**The Facts in Logical Space** Jason Turner, 2016 Philosophers have long been tempted by the idea that objects and properties are abstractions from the facts. But how is this abstraction supposed to go? If the objects and properties aren't already there, how do the facts give rise to them? Jason Turner develops and defends a novel answer to this question. The facts are arranged in a quasi geometric logical space and objects and properties arise from different quasi geometric structures in this space.

**How the Universe Operates** M J Baker, 2023-12-08 Why do the heavenly bodies behave in a contrary fashion to what we are familiar with on earth? Before a wheel can turn we must ensure rim is joined to axle; before a couple can dance in circle their hands must be joined. In contrast the planets circle the sun and the moons circle the planets without any securing mechanism and so precisely that their movements can be predicted to a millisecond. Again why is it that released from the effects of gravity, molten matter like water or molten lead forms spontaneously into tiny globes copying the form found in stars, planets and the sun? Are the tides satisfactorily explained by the thesis of gravitational pull of moon and sun? If so why does modern science have such difficulty reconciling the relative influences of these two bodies? What sort of reality is light and why is the speed of light fixed?
