Mobile Interactions in Context Jesper Kjeldskov,2014-07-01 This book presents a contextual approach to designing contemporary interactive mobile computer systems as integral parts of ubiquitous computing environments Interactive mobile systems services and devices have become functional design objects that we care deeply about Although their look feel and features impact our everyday lives as we orchestrate them in concert with a plethora of other computing technologies these artifacts are not well understood or created through traditional methods of user centered design and usability engineering Contrary to more traditional IT artifacts they constitute holistic user experiences of value and pleasure that require careful attention to the variety complexity and dynamics of their usage Hence the design of mobile interactions proposed in this book transcends existing approaches by using the ensemble of form and context as its central unit of analysis As such it promotes a designerly way of achieving convergence between form and context through a contextually grounded wholeness sensitive and continually unfolding process of design

Personality

Research, Methods, and Theory Patrick E. Shrout,Susan T. Fiske,2014-04-04 Donald W Fiske s professional life and

collaborations are themselves a textbook in the development of the field of personality From the field s early origins in

personnel selection rating accuracy and psychotherapy outcomes to its current status of theoretical and methodological

maturity complete with mid life crises the field has been fundamentally changed by Fiske s work and the changes have

influenced generations of scholars This festschrift is a celebration of Fiske s impact but not merely of his impact on the

history of personality research Instead the volume focuses on ongoing debates and issues that have been framed or

influenced by Fiske s work The festschrift s three sections are organized around three themes in Fiske s writings themes that

also correspond to three periods in his career. This volume examines current thinking about what can be known about personality how constructs relevant to personality psychology are best measured and how to approach specific research problems in personality and related fields. The contributors create an eminent cross section of the development and current status of personality methods. In addition to Fiske's eminent contemporaries the contributors to this volume include Fiske's former students, collaborators and his two children both of whom are behavioral scientists. The accomplishments of his students, colleagues and children testify to the range of psychologists who have benefited from his scholarly and practical wisdom. This collection is a valuable textbook for an advanced graduate course as well as appealing as a scholarly resource. Many of the contributors are renowned psychological leaders who have made available their latest original thoughts. The book concludes with an essay by Fiske offering his perspective on the central themes behavioral and social science metatheory methods and strategies.

[Enterprise Information Systems V](#) Olivier Camp, Joaquim Filipe, Slimane Hammoudi, Mario G. Piattini, 2006-02-27 This book comprises a set of papers selected from those presented at the fifth International Conference on Enterprise Information Systems ICEIS 2003 held in Angers France from 23 to 26 April 2003. The conference was organised by cole Sup rieure d'lectronique de l'Ouest ESEO of Angers France and the Escola Superior de Tecnologia of Setubal Portugal. Since its first edition in 1999 ICEIS focuses on real world applications and aims at bringing together researchers, engineers and practitioners interested in the advances and business applications of information systems. As in previous years ICEIS 2003 held four simultaneous tracks covering different aspects of enterprise computing Databases and Information Systems Integration Artificial Intelligence and Decision Support Systems Information Systems Analysis and Specification and Software Agents and Internet Computing. Although ICEIS 2003 received 546 paper submissions from over 50 countries only 80 were accepted as full papers and presented in 30 minutes oral presentations. With an acceptance rate of 15% these numbers demonstrate the intention of preserving a high quality forum for future editions of this conference. From the articles accepted as long papers for the conference only 32 were selected for inclusion in this book. Additional keynote lectures, tutorials and industrial sessions were also held during ICEIS 2003 and for the first time this year the 1st Doctoral Consortium on Enterprise Information Systems gave PhD students an opportunity to present their work to an international audience of experts in the field of information systems.
