## **Neurogenic Inflammation:**

*Neurogenic Inflammation in Health and Disease*, 2008-11-11 Morphological and functional studies revealed a complex system of primary sensory neurons that parallels the autonomic nervous system not only in its extent but probably also in its significance. Neuropeptides released from activated nociceptive afferent nerves play a pivotal role in inflammatory reactions and pain significantly modulate cardiac, vascular, respiratory, gastrointestinal and immune functions and influence the protective, restorative and trophic functions of somatic and visceral tissues. Several chapters of the book deal with the therapeutic potential of a new class of putative pain relieving agents acting through TRPV1, the capsaicin vanilloid receptor, a specific ion channel that transmits pain. Neurogenic inflammation in historical perspective, Cardiac protection by nociceptive afferents, Molecular mechanisms of nociception, Sensory mechanisms in migraine pathophysiology, Vagal signaling of visceral inflammation, Neurogenic mechanisms in arthritis, Therapeutic implications of vanilloid type compounds.

*Pain and Neurogenic Inflammation* S.D. Brain, P.K. Moore, 2013-03-11 This volume is intended to bring together recent advances in the often separate fields of pain and neurogenic inflammation. To this end, eminent researchers from both domains have contributed in-depth discussion of the mechanisms underlying these processes. Individual chapters focus on important recent discoveries such as the cloning of the capsaicin receptor and the discovery of RAMP proteins for CGRP receptors. This book provides an integrated account of recent advances in the fields of pain and neurogenic inflammation. The volume is intended to bring together studies from eminent researchers in the often separate research fields of pain and inflammation. Pain and Neurogenic Inflammation is aimed primarily at postgraduate researchers as well as academic and industrial researchers in pain and inflammation but is also likely to be of interest to undergraduate students seeking a firm grounding in the mechanisms underlying these important clinical conditions.

*Neurogenic Inflammation in Health and Disease* Gabor Jancso, 2008-12-10 Morphological and functional studies revealed a complex system of primary sensory neurons that parallels the autonomic nervous system not only in its extent but probably also in its significance. Neuropeptides released from activated nociceptive afferent nerves play a pivotal role in inflammatory reactions and pain significantly modulate cardiac, vascular, respiratory, gastrointestinal and immune functions and influence the protective, restorative and trophic functions of somatic and visceral tissues. Several chapters of the book deal with the therapeutic potential of a new class of putative pain relieving agents acting through TRPV1, the capsaicin vanilloid receptor, a specific ion channel that transmits pain. *Neurogenic Inflammation* Pierangelo Geppetti, Peter Holzer, 1996-03-22 Take advantage of this unique book, the first single volume resource to explore all important aspects of neurogenic inflammation. An unrivaled compilation of up-to-date information, *Neurogenic Inflammation* contains chapters

written by recognized authorities in their areas of expertise It covers the basic mechanisms and the pathophysiological implications of neurogenic inflammatory processes and points to novel therapeutic strategies in the field of inflammatory and related diseases The book highlights the many systems and mechanisms involved in neurogenic inflammation including vasodilatation plasma extravasation leukocyte adhesion smooth muscle contraction exocrine gland secretion and recruitment of inflammatory cells The authors discuss the contribution of neurogenic inflammation to human diseases such as migraine asthma arthritis and inflammatory bowel disease linked to the ubiquitous distribution of sensory nerves to organs and tissues at both the somatic and visceral level Neurogenic Inflammation is the clear choice for a one stop authoritative guide to the latest developments in this dynamic field

**Migraine: A Neuroinflammatory Disease?** Egilius L.H. Spierings,Margarita del Rio Sanchez,2012-11-28 The potential involvement of neurogenic inflammation in the pathogenesis of the migraine headache and the inhibition of this mechanism as a possible

mode of action of antimigraine medications are discussed in great depth in this volume The topics are approached from a pathophysiological as well as a clinical experimental perspective by a renowned group of clinicians and scientists who carefully consider the current future and potential therapeutic approaches to migraine treatment The first chapters of the book address the impact of migraine on a personal and societal level the presentation pathogenesis and treatment of migraine as well as the role of neurogenic inflammation Subsequent chapters present models of neurogenic inflammation related to the pathogenesis of the migraine headache focussing on the mediators and their receptors as well as on the involvement of mast cells The possibility of inhibition of neurogenic inflammation in abortive and preventive migraine treatment is also extensively discussed and a chapter on the question of whether migraine is a neuroinflammatory disease concludes this comprehensive analysis Clinicians and scientists interested in inflammation from a physiological or pharmacological perspective and those interested in the pathogenesis of headache migraine in particular are the intended audience for this unique body of work **Headache and Facial Pain** Franco Mongini,1999 Divided into four parts the classification criteria as well as etiologic factors and pathogenic mechanisms of headache and different types of facial pain are examined in the first part of the book The second part deals with general problems concerning diagnosis and choice of treatment The last two parts analyze the individual pathologies at the root of headache part three and facial pain part four A wide variety of classic and difficult clinical cases are presented The book can therefore be regarded as a study and consultation manual for neurologists headache specialists algologists anaesthetists dentists internists general practitioners and all those interested in the problem of headache and facial pain
