The Neurotic Constitution; Outlines of a Comparative Individualistic Psychology and Psychotherapy Alfred Adler, 2013-09 This historic book may have numerous typos and missing text Purchasers can usually download a free scanned copy of the original book without typos from the publisher Not indexed Not illustrated 1917 edition Excerpt PREFACE After I had made the attempt to investigate in the Studie iiber Minderwertigkeit von Organen the structure and tectonic of organs in association with their genetic basis their functional capability and destiny I proceeded supporting myself upon already available data as well as upon my own experience to apply the same method in the study of psychopathology In the book before us are embraced the most important results of my comparative individual psychologic studies of the neuroses As was the case in the theory of somatic inferiority an empiric basis is made use of in comparative individual psychology for the purpose of establishing a Active standard of normality in order to enable one to measure and compare with it grades of deviation from it In both of these scientific endeavors the comparative method of study reckons with the origin of phenomena dismisses from consideration the present and seeks to outline from them the future This method of approach leads us to view the compulsion of evolution and the pathological elaboration as the result of a conflict which breaks forth in the organic sphere for the purpose of attaining equipoise functional capability and adaptation the same struggle in the

psychic sphere is under the command of a fictitious idea of personality whose influence dominates the development of the neurotic character and symptoms If in the organic sphere the individual develops into a unit mass in which all of the individual parts cooperate toward a common goal Virchow if the various abilities and tendencies of the individual tend toward a purposefully directed unitpersonality then we may look upon every single manifestation of life as if in its past present and future there ar The Neurotic Constitution Alfred Adler,1930 NEUROTIC CONSTITUTION OUTLINES Alfred 1870-1937 Adler,2016-08-27 This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it This work was reproduced from the original artifact and remains as true to the original work as possible Therefore you will see the original copyright references library stamps as most of these works have been housed in our most important libraries around the world and other notations in the work This work is in the public domain in the United States of America and possibly other nations Within the United States you may freely copy and distribute this work as no entity individual or corporate has a copyright on the body of the work As a reproduction of a historical artifact this work may contain missing or blurred pages poor pictures errant marks etc Scholars believe and we concur that this work is important enough to be preserved reproduced and made generally available to the public We appreciate your support of the preservation process and thank you for being an important part of keeping this knowledge alive and relevant *The Neurotic Constitution* Alfred Adler,2013-11-05 First Published in 1999 This is Volume II of twenty one of the Individual Differences Psychology series Written in 1921 this study outlines a comparative Individualistic Psychology and Psychotherapy **The Neurotic Constitution** Alfred Adler,2015-02-08 This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it This work was reproduced from the original artifact and remains as true to the original work as possible Therefore you will see the original copyright references library stamps as most of these works have been housed in our most important libraries around the world and other notations in the work This work is in the public domain in the United States of America and possibly other nations Within the United States you may freely copy and distribute this work as no entity individual or corporate has a copyright on the body of the work As a reproduction of a historical artifact this work may contain missing or blurred pages poor pictures errant marks etc Scholars believe and we concur that this work is important enough to be preserved reproduced and made generally available to the public We appreciate your support of the preservation process and thank you for being an important part of keeping this knowledge alive and relevant *The Neurotic Constitution* Alfred Adler,2016-01-03 After I had made the attempt to investigate in the Studie uber Minderwertigkeit von Organen the structure and tectonic of organs in association with their genetic basis their functional capability and destiny I proceeded supporting myself upon already available data as well as upon my own experience to apply the same method in the study of psychopathology In the book before us are embraced the most important results of my comparative individual psychologic

studies of the neuroses As was the case in the theory of somatic inferiority an empiric basis is made use of in comparative individual psychology for the purpose of establishing a fictive standard of normality in order to enable one to measure and compare with it grades of deviation from it In both of these scientific endeavors the comparative method of study reckons with the origin of phenomena dismisses from consideration the present and seeks to outline from them the future This method of approach leads us to view the compulsion of evolution and the pathological elaboration as the result of a conflict which breaks forth in the organic sphere for the purpose of attaining equipoise functional capability and adaptation the same struggle in the psychic sphere is under the command of a fictitious idea of personality whose influence dominates the development of the neurotic character and symptoms If in the organic sphere the individual develops into a unit mass in which all of the individual parts co operate toward a common goal Virchow if the various abilities and tendencies of the individual tend toward a purposefully directed unit personality then we may look upon every single manifestation of life as if in its past present and future there are contained traces of a dominating guiding idea In this way it has appeared to the author of this book that the most minute trait of psychic life is permeated by a purpose force Comparative individualistic psychology sees in every psychic event the impress so to speak or symbol of a uniformly directed plan of life which only comes more clearly to light in the neuroses and psychoses The result of such an investigation of the neurotic character should furnish proof of the value and utility of our method of comparative individualistic psychology in the problems of mental life *The Neurotic Constitution* Alfred Adler, Bernard Glueck, 1917 NEUROTIC CONSTITUTION OUTLINES
