Reluctant Prophet Mike Deeb, Philippe Denis, Mark James, 2023-07-01. This book is a collection of essays in honour of Albert Nolan OP who died in October 2022 at the age of 88. Awarded the Order of Luthuli in Silver by then President Thabo Mbeki in 2003 for his life long dedication to the struggle for democracy, human rights and justice and for challenging the religious dogma, especially the theological justification for apartheid. Nolan inspired a generation of Christian activists and theologians. From 1973-1980 he served as national chaplain for the National Catholic Federation of Students (NCFS) and also until 1980 for the Catholic Students Association (CASA) which was formed in 1976 after black students began organising themselves into separate formations as Black Consciousness flourished. In 1977 Nolan was instrumental in establishing the Young Christian Students movement (YCS) in South Africa. The contributions in this volume come from people around the world who knew him or worked with him over the years. The contributions deal with his family life, his time with the student movements, his life as Dominican, his periods as Dominican Provincial in Southern Africa, his involvement with the ANC, his work as a writer, a publisher of a journal and life in his later years. There are over 65 contributions along with a Foreword by Timothy Radcliffe OP, a former Master General of the Dominicans. *New Action!*. Symbolizing, Modeling and Tool Use in Mathematics Education K.P. Gravemeijer, R. Lehrer, H.J. van Oers, Lieven Verschaffel, 2013-03-09. The almost universal rejection of the notion of symbols as carriers of meaning has created the need to find an alternative for the use of models as embodiments of mathematical concepts. By taking its point of departure as a concern for the way students actually use tools and symbols and for what these signify for them, this book explores the option of building on symbolizing, modelling and tool use as personally meaningful activities of students. This theme is approached from different angles and different perspectives. One dimension is that of setting varying from the study of informal spontaneous activity of students to an explicit focus on instructional design and goals and effects of instruction. Another dimension is the theoretical framework of the researcher varying from constructivism to activity theory, cognitive psychology and instructional design theory. This book will appeal to a wide audience varying from researchers to instructional designers.
