Includes separate historical surveys of key subgenres including time travel narratives, post-apocalyptic and post-disaster narratives, and works of utopian and dystopian science fiction. Each subgenre survey includes an extensive list of relevant critical readings, recommended novels in the subgenre, and recommended films relevant to the subgenre. Features entries on a number of key science fiction authors and extensive discussion of major science fiction novels or sequences. Writers and works include Isaac Asimov, Margaret Atwood, George Orwell, Ursula K. Le Guin, *The War of the Worlds* 1898, *Starship Troopers* 1959, *Mars Trilogy* 1993-6, and many more. A Science Fiction Glossary completes this indispensable Handbook.

Cultural Legal Studies of Science Fiction Alex Green, Mitchell Travis, Kieran Tranter, 2024-10-28 This book presents and engages the world building capacity of legal theory through cultural legal studies of science and speculative fictions. In these studies the contributors take seriously the legal world building of science and speculative fiction to reveal, animate, and critique legal wisdom, jurisprudence. Following a common approach in cultural legal studies, the contributors engage directly and in detail with specific cultural texts, novels, television, films, and video games in order to explore a range of possible legal futures. The book is organized in three parts: first, the contextualisation of science and speculative fiction as jurisprudence; second, the temporality of law and legal theory; and third, the analysis of specific science and speculative fictions. Throughout the contributors reveal the way in which law as nomos builds normative universes through the narration of a future. This book will appeal to scholars and students with interests in legal theory, cultural legal studies, law and the humanities, and law and literature.

The Rise and Fall of American Science Fiction, from the 1920s to the 1960s Gary Westfahl, 2019-10-04 By examining important aspects of science fiction in the twentieth century, this book explains how the genre evolved to its current state. Close critical attention is given to topics including the art that has accompanied science fiction, the subgenres of space opera and hard science fiction, the rise of SF anthologies, and the burgeoning impact of the marketplace on authors. Included are in-depth studies of key texts that contributed to science fiction's growth, including Philip Francis Nowlan's first Buck Rogers story, the first published stories of A. E. van Vogt, and the early juveniles of Isaac Asimov, Arthur C. Clarke, and Robert Heinlein.

The Victorian Era in Twenty-First Century Children's and Adolescent Literature and Culture Sonya Sawyer Fritz, Sara K. Day, 2018-01-19 Victorian literature for audiences of all ages provides a broad foundation upon which to explore complex and evolving ideas about young people. Passion is inversely proportional to the amount of real information available. That maxim is a quotation from *Timescape* Benford's Nebula and Campbell Award winning 1980 novel which established his work as an exemplar of hard science fiction dedicated to working out the consequences of modern science rather than substituting pseudoscience for fantasy. Like many other current science fiction writers Benford has tackled the major genres space travel time travel technology running amok prolonged longevity searing apocalyptic cosmic events and alien life which he theorizes to be more likely viral than intelligent. An astrophysicist by training and profession Benford has published more than twenty novels over one hundred short stories some fifty essays and myriad articles that display both his scientific rigor as well as a recognition of literary traditions. In this study George Slusser explores the extraordinary seemingly inexhaustible display of creative energy in Gregory Benford's life and work. Presenting Benford's ideas on science and the writing of science fiction the volume addresses the writer's literary production and his place in contemporary science fiction. By identifying direct sources and making parallels with other works and writers Slusser reveals the vast scope of Benford's knowledge both of literature and of the major scientific and philosophical issues of our time. Slusser also discusses Benford's numerous scientific articles and nonfiction books and includes a new interview with Benford *Disputing the Deluge* Darko Suvin, 2021-12-02 Featured on the 2021 Locus Recommended Reading List. For over 50 years Darko Suvin has set the agenda for science fiction studies through his innovative linking of scifi to utopian studies formalist and leftist critical theory and his broader engagement with what he terms political epistemology. *Disputing the Deluge* joins a rapidly growing renewal of critical interest in Suvin's work on scifi and utopianism by bringing together in a single volume 24 of Suvin's most significant interventions in the field from the 21st century with an Introduction by editor Hugh O'Connell and a new preface by the author. Beginning with writings from the early 2000s that investigate the function of literary genres and reconsider the relationship between science fiction and fantasy the essays collected here each a brilliant example of engaged thought highlight the value of scifi for grappling with the key events and transformations of recent years. Suvin's interrogations show how speculative fiction has responded to 9/11 the global war on terror the 2008 economic collapse and the rise of conservative populism along with contemporary critical

utopian analyses of the Capitalocene the climate crisis COVID 19 and the decline of democracy By bringing together Suvin s essays all in one place this collection allows new generations of students and scholars to engage directly with his work and its continuing importance and timeliness **First Aid to the Opera-goer** Mary Watkins Cushing,1924 *New Boundaries in Political Science Fiction* Donald M. Hassler,Clyde Wilcox,2008 This book offers an interpretation of the evolution of a growing genre in literary film and television As a follow up to their 1997 collection Political Science Fiction Hassler and Wilcox have assembled twenty four noted international scholars representing diverse fields of inquiry to assess the influential voices and trends from the past decade in New Boundaries in Political Science Fiction The terrors and technologies that permeate our daily lives have changed radically in the past decade further highlighting the underlying speculations on our contested future that remain the core of this genre In surveying the vast expanse of politically charged science fiction of recent years the editors posit that the defining dilemma for these tales rests in whether identity and meaning germinate from progressive linear changes or progress or from a continuous return to primitive realities of war death and the competition for survival The discussion of political implications ranges among writers from H G Wells Robert A Heinlein Ursula Le Guin and Isaac Asimov to more radical recent voices such as Iain M Banks William Gibson Joanna Russ Philip K Dick and China Mieville While emphasizing the literature the collection also addresses political science fiction found on film and television from the original Star Trek through the newest incarnation of Battlestar Galactica **Foundation** ,1983 **Frontiers Past and Future** Carl Abbott,2006 Abbott offers a fruitful new way to read science fiction one that also greatly enriches our understanding of western history and its impact on our collective imagination Detailing the overlap of science fiction and western fiction especially relating to their mutual interest in and concerns about frontier expansionism he reveals an unsuspected common ground that informs the writings of both camps Reviewing the work of many Hugo and Nebula Award winners as well as drawing upon popular film and television series like the Buck Rogers serials Abbott s study journeys across the far reaches of science fiction s universe
