Neurofuzzy Pattern Recognition

Nikola K. Kasabov, Robert Kozma

Neurofuzzy Pattern Recognition:

Neuro-fuzzy Pattern Recognition Horst Bunke, Abraham Kandel, 2000 Neural networks and fuzzy techniques are among the most promising approaches to pattern recognition. Neuro fuzzy systems aim at combining the advantages of the two paradigms. This book is a collection of papers describing state of the art work in this emerging field. It covers topics such as feature selection, classification, classifier training and clustering. Also included are applications of neuro fuzzy systems in speech recognition, land mine detection, medical image analysis and autonomous vehicle control. The intended audience includes graduate students in computer science and related fields as well as researchers at academic institutions and in industry.

Neuro-Fuzzy Pattern Recognition Sankar K. Pal, Sushmita Mitra, 1999 The neuro fuzzy approach to pattern recognition a unique overview. Recent years have seen a surge of interest in neuro fuzzy computing which combines fuzzy logic, neural networks and soft computing techniques. This book focuses on the application of this new tool to the rapidly evolving area of pattern recognition. Written by two leaders in neural networks and soft computing research this landmark work presents a unified comprehensive treatment of the state of the art in the field. The authors consolidate a wealth of information previously scattered in disparate articles, journals and edited volumes explaining both the theory of neuro fuzzy computing and the latest methodologies for performing different pattern recognition tasks in the neuro fuzzy network classification, feature evaluation, rule generation, knowledge extraction and hybridization. Special emphasis is given to the integration of neuro fuzzy methods with rough sets and genetic algorithms (GAs) to ensure more efficient recognition systems. Clear, concise and fully referenced. Neuro Fuzzy Pattern Recognition features extensive examples and highlights key applications in speech, machine learning, medicine and forensic science. It is an extremely useful resource for scientists and engineers in laboratories and industry as well as for anyone seeking up to date information on the advantages of neuro fuzzy pattern recognition in new computer technologies.

Rough-Fuzzy Pattern Recognition Pradipta Maji, Sankar K. Pal, 2012-02-14 Learn how to apply rough fuzzy computing techniques to solve problems in bioinformatics and medical image processing. Emphasizing applications in bioinformatics and medical image processing this text offers a clear framework that enables readers to take advantage of the latest rough fuzzy computing techniques to build working pattern recognition models. The authors explain step by step how to integrate rough sets with fuzzy sets in order to best manage the uncertainties in mining large data sets. Chapters are logically organized according to the major phases of pattern recognition systems development making it easier to master such tasks as classification, clustering and feature selection. Rough Fuzzy Pattern Recognition examines the important underlying theory as well as algorithms and applications helping readers see the connections between theory and practice. The first chapter provides an introduction to pattern recognition and data mining including the key challenges of working with high dimensional real life data sets. Next the authors explore such topics and issues as Soft computing in pattern recognition and data mining. A mathematical framework for generalized rough sets

incorporating the concept of fuzziness in defining the granules as well as the set Selection of non redundant and relevant features of real valued data sets Selection of the minimum set of basis strings with maximum information for amino acid sequence analysis Segmentation of brain MR images for visualization of human tissues Numerous examples and case studies help readers better understand how pattern recognition models are developed and used in practice This text covering the latest findings as well as directions for future research is recommended for both students and practitioners working in systems design pattern recognition image analysis data mining bioinformatics soft computing and computational intelligence

Neuro-Fuzzy and Fuzzy-Neural Applications in Telecommunications Peter Stavroulakis,2012-12-06 Neurofuzzy and fuzzyneural techniques as tools of studying and analyzing complex problems are relatively new even though neural networks and fuzzy logic systems have been applied as computational intelligence structural e ments for the last 40 years

Computational intelligence as an independent scientific field has grown over the years because of the development of these structural elements Neural networks have been revived since 1982 after the seminal work of J J Hopfield and fuzzy sets have found a variety of applications since the publication of the work of Lotfi Zadeh back in 1965 Artificial neural networks ANN have a large number of highly interconnected processing elements that usually operate in parallel and are configured in regular architectures The collective behavior of an ANN like a human brain demonstrates the ability to learn recall and generalize from training patterns or data The performance of neural networks depends on the computational function of the neurons in the network the structure and topology of the network and the learning rule or the update rule of the connecting weights This concept of trainable neural networks further strengthens the idea of utilizing the learning ability of neural networks to learn the fuzzy control rules the membership functions and other parameters of a fuzzy logic control or decision systems as we will explain later on and this becomes the advantage of using a neural based fuzzy logic system in our analysis On the other hand fuzzy systems are structured numerical estimators

Neuro-Fuzzy Techniques for Intelligent Information Systems Nikola K. Kasabov, Robert Kozma, 1999-03-29 This volume comprises selected chapters that cover contemporary issues of the development and the application of neuro fuzzy techniques. Developing and using neural networks, fuzzy logic systems, genetic algorithms and statistical methods as separate techniques or in their combination have been research topics in several areas such as mathematics, engineering, computer science, physics, economics and finance. Here the latest results in the fields are presented from both theoretical and practical point of view. The volume has four main parts. Part one presents generic techniques and theoretical issues while parts two, three and four deal with practically oriented models, systems and implementations.

Neuro-fuzzy and Soft Computing Jyh-Shing Roger Jang, Chuen-Tsai Sun, Eiji Mizutani, 1997 Neuro Fuzzy and Soft Computing provides the first comprehensive treatment of the constituent methodologies underlying neuro fuzzy and soft computing, an evolving branch of computational intelligence. The constituent methodologies include fuzzy set theory, neural networks, data clustering techniques and several stochastic optimization methods that do not require gradient information. In particular, the authors put equal emphasis on theoretical aspects of covered methodologies as well as empirical observations and verifications of various applications in practice. The book is well suited for use as a text for courses on computational intelligence and as a single reference source for this emerging field. To help readers understand the material, the presentation includes more than 50 examples, more than 150 exercises, over 300 illustrations and more than 150 Matlab scripts. In addition, Matlab is utilized to visualize the processes of fuzzy reasoning, neural network learning, neuro fuzzy integration and training, and gradient free optimization such as genetic algorithms, simulated annealing, random search and downhill Simplex method. The presentation also makes use of SIMULINK for neuro fuzzy control system simulations. All Matlab scripts used in the book are available on the free companion software disk that may be ordered by using the enclosed reply card. The book also contains an Internet Resource Page to point the reader to on line neuro fuzzy and soft computing home pages, publications, public domain software, research institutes, news groups, etc. All the HTTP and FTP addresses are available as a bookmark file on the companion software disk.
