The Lowland Maya Postclassic Arlen F. Chase,Prudence M. Rice,2014-11-17 This collection represents a major step forward in understanding the era from the end of Classic Maya civilization to the Spanish conquest **Lowland Maya Settlement Patterns** Wendy Ashmore,1981 **Maya E Groups** David A. Freidel,Arlen F. Chase,Anne S. Dowd,Jerry Murdock,2017-08-08 E groups are not the fifth element but a group of structures in the temple complexes of Classic Maya City centers In this volume from distinguished researchers of the Classic period the E groups prove to be more than just records of the sun's passages through the years **Pre-Mamom Pottery Variation and the Preclassic Origins of the Lowland Maya** Debra S. Walker,2023-04-15 Pre Mamom Pottery Variation and the Preclassic Origins of the Lowland Maya summarizes archaeological researchers current views on the adoption and first use of pottery across the Maya lowlands Covering the early Middle Preclassic period when communities began using and producing pottery for the first time roughly 1000-600 BC through to the establishment of a recognizably Maya tradition termed the Mamom ceramic sphere about 600-300 BC the book demonstrates that the adoption was broadly contemporary with variation in how the new technology was adapted locally Analyzing ceramics found at sites in Belize Petén Guatemala and Mexico the contributors provide evidence that the pre Mamom expansion of pottery resulted from increased dependence on maize agriculture exploitation of limestone caprock and greater reliance on a preexisting system of long distance exchange The chapters describe the individual

experiences of new pottery communities at various sites across the region. They are supplemented by appendixes presenting key chronological data as well as the principal types and varieties of pre-Mamom ceramic complexes across the various spheres Xe Eb Swasey Cunil and Ek A. A significant amount of new material has been excavated in the last decade changing what is known about the early Middle Preclassic period and making Pre-Mamom Pottery Variation and the Preclassic Origins of the Lowland Maya a first read of the early ceramic prehistory of the Maya lowlands. It will be a valuable resource for students and scholars interested in the archaeology of the Maya lowlands, Mesoamerican social complexity and ceramic technology.

Pathways to Complexity M. Kathryn Brown, George J. Bey III, 2021-04-27. *Pathways to Complexity* synthesizes a wealth of new archaeological data to illuminate the origins of Maya civilization and the rise of Classic Maya culture. In this volume, prominent Maya scholars argue that the development of social, religious, and economic complexity began during the Middle Preclassic period (1000–300 B.C.) hundreds of years earlier than previously thought. Contributors reveal that villages were present in parts of the lowlands by 1000 B.C., challenging the prevailing models estimating when civilization took root in the area. Combining recent discoveries from the northern lowlands, an area often neglected in other volumes, and the southern lowlands, the collection then traces the emergence of sociopolitical inequality and complexity in all parts of the Yucatan peninsula over the course of the Middle Preclassic period. They show that communities evolved in different ways due to influences such as geographical location, ceramic exchange, shell ornament production, agricultural strategy, religious ritual ideology, and social rankings. These varied pathways to complexity developed over half a millennium and culminated in the institution of kingship by the Late Preclassic period. Presenting exciting work on a dynamic and poorly understood time period, *Pathways to Complexity* demonstrates the importance of a broad comparative approach to understanding Preclassic Maya civilization and will serve as a foundation for future research and interpretation.

Lifeways in the Northern Maya Lowlands Jennifer P. Mathews, Bethany A. Morrison, 2006. The flat, dry reaches of the northern Yucatán Peninsula have been largely ignored by archaeologists drawn to the more illustrious sites of the south. This book is the first volume to focus entirely on the northern Maya lowlands, presenting a broad cross section of current

research projects in the region by both established and up and coming scholars To address the heretofore unrecognized importance of the northern lowlands in Maya prehistory the contributors cover key topics relevant to Maya studies the environmental and historical significance of the region the archaeology of both large and small sites the development of agriculture resource management ancient politics and long distance interaction among sites As a volume in the series Native Peoples of the Americas it adds a human dimension to archaeological findings by incorporating modern ethnographic data By exploring various social and political levels of Maya society through a broad expanse of time Lifeways in the Northern Maya Lowlands not only reconstructs a little known past it also suggests the broad implications of archaeology for related studies of tourism household economies and ethnoarchaeology It is a benchmark work that pointedly demonstrates the need for researchers in both north and south to ignore modern geographic boundaries in their search for new ideas to further their understanding of the ancient Maya

Highland-lowland Interaction in Mesoamerica Arthur G. Miller, 1983 **Classic Maya Polities of the Southern Lowlands** Damien B. Marken, James L. Fitzsimmons, 2015-11-02

Classic Maya Polities of the Southern Lowlands investigates Maya political and social structure in the southern lowlands assessing comparing and interpreting the wide variation in Classic period Maya polity and city composition development and integration Traditionally discussions of Classic Maya political organization have been dominated by the debate over whether Maya polities were centralized or decentralized With new largely unpublished data from several recent archaeological projects this book examines the premises strengths and weaknesses of these two perspectives before moving beyond this long standing debate and into different territory The volume examines the articulations of the various social and spatial components of Maya polity the relationships strategies and practices that bound households communities institutions and dynasties into enduring or short lived political entities By emphasizing the internal negotiation of polity the contributions provide an important foundation for a more holistic understanding of how political organization functioned in the Classic period
