Testing the Theory that Pets Can Help to Alleviate Loneliness Andrew Paul Gilbey,2014 Animals as the Third in

Relational Psychotherapy Jo Silbert, Jo Frasca, 2021-03-03 Animals as the Third in Relational Psychotherapy Exploring Theory Frame and Practice elegantly and skilfully weaves together relevant literature clinical reflections compelling case material and contemporary psychoanalytic theory to demonstrate how the presence of an animal in the treatment arena can eventually bring about relational interpersonal and intrapsychic change Contemporary relational psychoanalytic literature has been virtually silent about our relationship with animals a feature seemingly intrinsic to our relational worlds This book seeks to remediate this void by giving voice to the practice and principles of working relationally in the presence of an animal The text accentuates recurrent themes animals are seen by human beings as significant subjective others and are treated as legitimate partners for relational and interpersonal processes attachment figures and transference objects animals in the psychotherapy environment can play the role as a bridge from the unconscious to the conscious from the dissociated to the experienced from the intrapsychic to the interpersonal as the third in the treatment arena the animal helps to reveal the field bringing conflicts to life and making them available for analysis in the clinical setting In seeking to authorise the incorporation of animals into the practice of relational psychotherapy the text applies conventional concepts to novel contexts it extends psychoanalytic and relational principles to create a theoretical framework within which to consider the therapeutic effects of working in the triadic interactions of therapist client and animal and thus also begins to evolve a new version of relational psychoanalytic practice The authors value the human animal experience in treatment and repeatedly show how the application of a relational psychoanalytic lens to the patient therapist animal triad can enhance the therapeutic process in ways that encourage progressive communication understanding of the patient and the relaxing of defences leading to the symbolising of relational capacity therapeutic breakthrough and intrapsychic change Contemporary Animal Learning Theory Anthony Dickinson, 1980 A comprehensive 1980 study of the way in which animals learn particularly about the relationship between events in their environment *Humans and Pets Behavioral Interaction Model* Anastasia Nikolskaya, 2013-12 Having been consulting pet owners on the problems with their pets for many years author and researcher Dr Anastasia Nikolskaya focuses on the connection between a pet owner's psychological state and an animal's behavioral health An animal is often just a mirror of its owner's state of mind Thus this book proposes that pets should be regarded as an instrument for psychological diagnostics in order to spot their owner's personal or an environmental deficiency Animal Theory Derek Ryan, 2015-06-14 From caged orangutans to roasted pig from dog training to horse phobias from communicating bees to ruminating cows over the course of an introduction and four thematically organised chapters Derek Ryan explores how animals are encountered in theoretical discourse **Animals ... in Theory**, 2012 *Pets and People* Barrie Gunter, 1999-06-02 In an examination of the relationship between pets and people Barrie Gunter illustrates the many psychological benefits that animal companionship can bestow upon us providing security for the anxious companionship for the lonely and status symbols for the image conscious This book examines the phenomenon of pet

ownership and the importance placed upon this strange relationship by people in modern society
