## Lu Ban Learns Carpentry:

**Lu Ban Learns Carpentry**, 1980-07-01     Architecture, Ritual and Cosmology in China Xuemei Li, 2023-05-31 Drawing on the author's extensive fieldwork in the Dong areas in southwest China this book presents a detailed picture of the Dong's buildings and techniques with new insights into the Dong's cosmology and rituals of everyday life meshed with the architecture and the symbolic meanings. It examines how the buildings and techniques of the Dong are ordered and influenced by the local culture and context. The timber bridges and drum towers are the Dong's most prominent architectural monuments. Usually built elaborately with multiple roofs, these bridges and drum towers were designed and maintained by the local carpenters who also built the village suspended houses in an oral tradition carried down from father to son or to apprentice. They were funded entirely by the local people and the bridges tend to be built in places without great pressure of traffic or another bridge already existing close by. Why does such great expense go into the Dong's buildings with elaboration? How were they built? And what do they mean to their users and builders? This book is an anthropological study on the Dong's architecture and technique and it aims to contribute a discourse on the interdisciplinary research area. It is suitable for graduate and postgraduate readers.     Educational Innovation Through Technology Qingtang Liu, Jing Lei, Liming Zhang, Yantao Wei, 2025-08-19 The volume CCIS 2600 constitutes the refereed post-conference proceedings of the 13th International Conference of Educational Innovation through Technology EITT 2024 Macau China during November 8-10, 2024. The 17 revised full papers and 7 short papers presented in these proceedings were carefully reviewed and selected from 78 submissions. The papers are organized in the following topical sections: AI-Powered Educational Innovation, Tech-Enhanced Curriculum, Teaching Innovations, and AI-driven Learning Analytics Assessment.     *Reconstruction Designs of Lost Ancient Chinese Machinery* Hong-Sen Yan, 2007-11-18 South-pointing chariots, walking machines, and the astronomical mechanical clock are all used as illustrated examples in this fascinating and unique study of lost machinery in ancient China. This is the first book of its kind combining creative mechanism design methodology with mechanical evolution and variation theory to set out how some ancient designs can be recreated. Furthermore, the book reflects on how age-old wisdoms could stimulate stunning new machinery in the future.     Euclid in China Engelfriet, 2021-11-01 As part of the Jesuits' programme of introduction to European culture in 1607, the *Elements of Euclid* (300 BC) were translated for the first time into Chinese. The translation of this epoch-making ancient Greek textbook on deductive geometry meant a confrontation of contemporary Chinese and European cultures. Part I of Peter Engelfriet's work deals mainly with the European and Chinese backgrounds; part II with linguistic and textual matters. In part III, the manner in which learned Chinese tried to integrate this new knowledge into their own Chinese mathematical and cultural traditions comes to the fore. This fascinating work explores in depth and at various levels the circumstances and mechanisms that shaped the transmission of a key work of science from one language and cultural context onto another. Consequently, it offers often surprising insights into the ways of intercultural
