Advanced Language Learning:

Advanced Language Learning Heidi Byrnes, 2008-12-08 The editor and authors in this volume make a convincing case for focusing on advanced foreign language instruction. Importantly they invite consideration of this focus as an opportunity to re-examine conventional definitions of the target of instruction. In so doing readers also learn more about the theories highlighted in this volume and their capacity to enhance our understanding of advancedness and its development within an educational context. This book thus mediates between linguistic and language learning theories and educational practice modelling the very best of what applied linguistics has to offer. Diane Larsen Freeman, Professor of Education, University of Michigan. The reality of multicultural societies and globalization has increased the demand for language abilities that far exceed those that have typically been associated with communicative competence in a second language. This book examines the acquisition of advanced levels of ability in three parts: theoretical, descriptive and instructional. It moves beyond the traditional constraints of second language acquisition research by linking systemic functional linguistics and sociocultural theory. The contributors draw primarily on the work of Halliday, Vygotsky and Bakhtin as well as empirical data from the language classroom to suggest practical applications towards advanced literacy and linguistic competence. **Advanced Language Learning** will be of interest to academics researching systemic functional linguistics, second language acquisition and applied linguistics.

Language Learning Strategies and Advanced Language Learners Christopher A. Cajski, 1999 Language learning strategies (LLS) here defined as specific actions or mental procedures that assist in fulfilling language learning goals have attracted increasing attention as one of the factors that impact second language acquisition. A key reason for their appeal is that language learning strategies can be manipulated to an extent that most other language acquisition factors cannot. Moreover, these strategies appear to be a relatively powerful factor in learning another language. Nearly all of the language learning strategy research to date has been conducted with the intention of helping less successful language learners. However, advanced language learners stand to benefit greatly from language learning strategy research as well. The purpose of this thesis is to examine the research done on language learning strategies and language learning strategy instruction, especially as it pertains to advanced adult learners of a second or foreign language. This paper provides a comprehensive review of LLS studies and research findings and concludes with an alternative paradigm of and approach to language learning strategy instruction for advanced language learners. The appendix, which includes tables such as a list of factors that affect second language acquisition and LLS selection and use, may also have special appeal to researchers in this area. Contains 7 tables.

Effective Language Learning Suzanne Graham, 1997 This book investigates some of the learning processes of students of French and German as they begin language learning at an advanced level, a stage which is frequently problematic. By looking at the learning strategies employed by both successful and less successful language students, the author elucidates some of the key cognitive and affective processes which facilitate advanced level language learning. The

implications of this for the classroom are discussed in detail leading to practical recommendations for learning and teaching strategies A central theme is the need to teach explicitly the proficient use of learning strategies and suggestions are made as to how this may be achieved in the language classroom **To Advanced Proficiency and Beyond** Newel Anthony Brown, Jennifer Bown, 2015-01-02 Due to the pressures of globalization American society increasingly needs citizens who can carry out Superior level functions in languages other than English Instructors researchers and students of second language acquisition seek scholarly resources to help satisfy this demand In this volume leading experts in second language acquisition and language planning supply cutting edge research on working memory and cognition and empirical studies of effective teaching The theoretical and empirical work in these pages is complemented by descriptions of successful pedagogical practices that take students from the Advanced to the Superior levels and beyond With examples ranging across a number of languages including Russian Chinese and Arabic the volume will serve a broad audience This practical handbook will help seasoned instructors improve outcomes while it can also be used for training new instructors in methods courses

Teaching Advanced Language Skills through Global Debate Tony Brown, Jennifer Bown, 2014-12-15 Using debate to develop advanced competency in a second language is a method that is finding increased interest among instructors and students alike whether in synchronous online teaching or the individual classroom Through debate students learn how to make hypotheses support their conclusions with evidence and deploy the rhetoric of persuasion in the target language Though this method provides an exciting pedagogy for moving students from the advanced to the superior level there is a paucity of materials available for instructors who wish to plan a curriculum focused on debate Teaching Advanced Language Skills through Global Debate Theory and Practice provides teachers with both the theoretical underpinnings for using debate in the foreign language classroom as well as practical advice for developing reading listening writing and speaking skills through debate It discusses task based language learning and helps instructors design debate related tasks for the classroom Teaching Advanced Language Skills through Global Debate will be useful for any instructor working at the advanced level and particularly for those training future language instructors One of the new digital short publications available through Georgetown University Press it is an ideal complement to the press's new titles on mastering languages through global debate Georgetown Digital Shorts longer than an article shorter than a book deliver timely works of peer reviewed scholarship in a fast paced agile environment They present new ideas and original texts that are easily and widely available to students scholars libraries and general readers **Foreign Language Anxiety and the Advanced Language Learner** Zsuzsa Tóth, 2010-08-11 Does anxiety about learning and using a foreign language decline as learners become more competent in the target language or is anxiety also relevant at higher levels of proficiency This is the question Foreign Language Anxiety and the Advanced Language Learner sets out to explore The aim of the book is to give readers an insight into what role anxiety plays in the language learning and communication processes of advanced language learners

Specifically the study examines how advanced EFL learners foreign language anxiety FLA can be characterized how anxiety relates to other individual differences cognitive affective personality and explores the relationship between FLA and various aspects of learners performance and communication experience in the target language The research context is Hungary The findings however are not confined to the Hungarian EFL setting In addition to making a contribution to the clarification of some unresolved issues in language anxiety research including the role of proficiency in the development of anxiety the relationship between anxiety and other learner variables and the much debated question of whether or not anxiety accounts for differential success in L2 learning this study has important implications for language teachers as well

Sprang, 2006-10-06 Advanced language learning has only recently begun to capture the interest and attention of applied linguists and professionals in language education in the United States In this breakthrough volume experts in the field lay the groundwork for approaching the increasingly important role of advanced language learning in the larger context of multilingual societies globalization and security This volume presents both general and theoretical insights and language specific considerations in college classrooms spanning a range of languages from the commonly taught languages of English French and German to the less commonly taught Farsi Korean Norwegian and Russian Among theoretical frameworks likely to be conducive to imagining and fostering instructed advancedness in a second language this volume highlights a cognitive semantic approach The theoretical and data based findings make clear that advanced learners in particular are characterized by the capacity to make situated choices from across the entire language system from vocabulary and grammar to discourse features which suggests the need for a text oriented meaning driven approach to language teaching learning and research This volume also considers whether and how information structuring in second language composition reveals first language preferences of grammaticized concepts Other topics include curricular and instructional approaches to narrativity vocabulary expansion the demands on instructed programs for efficiency and effectiveness in order to assure advanced levels and learners ability to function in professional contexts with their diverse oral and written genre requirements Finally the volume probes the role and nature of assessment as a measurement tool for both researching and assessing advanced language learning and as an essential component of improving programs

Form-focused Instruction and the Advanced Language Learner Anna Turula, 2011 Form Focused Instruction and the Advanced Language Learner looks at the role of FFI at higher levels of

foreign language learning It argues that contrary to a common belief there are aspects of grammar to be taught to the proficient FL user While such a learner may be familiar with formal properties of different structures s he still needs to focus on the semantics of target language grammar Considering this the book investigates the efficiency of a FFI treatment called Organic Approach Deductivised or 3 D language pedagogy devised to teach the semantics of the English tense and aspect system to the advanced EFL learner In doing so the book takes the reader through different aspects of focus on form looking at the semantics of the English time talk from the cognitive perspective
