Model Of The Universe Space Time Probability And Decision:

A Model of the Universe Storrs McCall, 1994 He shows that this theory can illuminate a wide variety of hitherto unresolved philosophical problems these include the direction and flow of time the nature of scientific laws the interpretation of quantum mechanics the definition of probability counterfactual semantics and the notions of identity essential properties deliberation decision and free will A Model of the Universe, 1994 The author presents an original philosophical theory of

the nature of the universe based on a striking new model of its space time structure He shows that this theory can illuminate a wide variety of hitherto unresolved philosophical problems These include the direction and flow of time the nature of scientific laws the interpretation of quantum mechanics the definition of probability and more The Consistency of

Arithmetic Storrs McCall, 2014 This volume contains six new and fifteen previously published essays plus a new introduction by Storrs McCall Some of the essays were written in collaboration with E J Lowe of Durham University The essays discuss controversial topics in logic action theory determinism and indeterminism and the nature of human choice and decision Some construct a modern up to date version of Aristotle's bouleusis practical deliberation This process of practical deliberation is shown to be indeterministic but highly controlled and the antithesis of chance Others deal with the concept of branching four dimensional space time explain non local influences in quantum mechanics or reconcile God's omniscience with human free will The eponymous first essay contains the proof of a fact that in 1931 Kurt G del had claimed to be unprovable namely that the set of arithmetic truths forms a consistent system **The Many Futures of a Decision** Jay Lampert, 2018-06-28

Combining two a central topics in philosophy in the 20th Century this book considers the ethics and impact of decision making alongside the philosophy of time When we make simple decisions like the decision to wake up at 8 a m tomorrow we make use of a linear model of the future But when we make open ended decisions like the decision to get fitter or more involved in politics we presuppose a much more complex model of the future We project a variety of virtual futures We can carry out a decision in many different ways at once which may converge and diverge at different points in time Using a phenomenological approach **The Many Futures of a Decision** explores what we learn about the structure of the future specifically from decision making Most theories of decision concentrate on the rationality the evidence and value assessments that build up grounds for a rational decision Instead this book innovatively engages with the nature of the future as a multi layered decisions project Through interpretations of the theories of decision in philosophers like Husserl and Heidegger Schmitt and Habermas Derrida and Deleuze along with other decision theories Lampert develops an original theory of multiple futures **Physics of the Human Temporality** Ihor Lubashevsky, Natalie Plavinska, 2021-10-21 This

book presents a novel account of the human temporal dimension called the human temporality and develops a special mathematical formalism for describing such an object as the human mind One of the characteristic features of the human mind is its temporal extent For objects of physical reality only the present exists which may be conceived as a point like

moment in time In the human temporality the past retained in the memory the imaginary future and the present coexist and are closely intertwined and impact one another This book focuses on one of the fragments of the human temporality called the complex present A detailed analysis of the classical and modern concepts has enabled the authors to put forward the idea of the multi component structure of the present For the concept of the complex present the authors proposed a novel account that involves a qualitative description and a special mathematical formalism This formalism takes into account human goal oriented behavior and uncertainty in human perception The present book can be interesting for theoreticians physicists dealing with modeling systems where the human factor plays a crucial role philosophers who are interested in applying philosophical concepts to constructing mathematical models and psychologists whose research is related to modeling mental processes

Facing the Future Nuel Belnap, Michael Perloff, Ming Xu, 2001-08-02 Here is an important new theory of human action a theory that assumes actions are founded on choices made by agents who face an open future It is a theory that makes indeterminism not only intelligible but illuminating Tools from philosophy of language and philosophical logic help generate a full scale account of agents seeing to it that The authors then proceed to clarify a variety of action related topics such as determinism vs indeterminism imperatives promises strategies joint agency could have done otherwise deontic constructions and assertions about a not yet settled future

The Philosophy of Science Fiction Film Steven Sanders, 2007-12-14 The science fiction genre maintains a remarkable hold on the imagination and enthusiasm of the filmgoing public captivating large audiences worldwide and garnering ever larger profits Science fiction films entertain the possibility of time travel and extraterrestrial visitation and imaginatively transport us to worlds transformed by modern science and technology They also provide a medium through which questions about personal identity moral agency artificial consciousness and other categories of experience can be addressed In *The Philosophy of Science Fiction Film* distinguished authors explore the storylines conflicts and themes of fifteen science fiction film classics from *Metropolis* to *The Matrix* Editor Steven M Sanders and a group of outstanding scholars in philosophy film studies and other fields raise science fiction film criticism to a new level by penetrating the surface of the films to expose the underlying philosophical arguments ethical perspectives and metaphysical views Sanders's introduction presents an overview and evaluation of each essay and poses questions for readers to consider as they think about the films under discussion The first section *Enigmas of Identity and Agency* deals with the nature of humanity as it is portrayed in *Blade Runner* *Dark City* *Frankenstein* *Invasion of the Body Snatchers* and *Total Recall* In the second section *Extraterrestrial Visitation Time Travel and Artificial Intelligence* contributors discuss 2001 *A Space Odyssey* *The Terminator* *12 Monkeys* and *The Day the Earth Stood Still* and analyze the challenges of artificial intelligence the paradoxes of time travel and the ethics of war The final section *Brave Newer World Science Fiction Futurism* looks at visions of the future in *Metropolis* *The Matrix* *Alphaville* and screen adaptations of George Orwell's 1984
