

Fundamental principles of optical computing

Optical computing harnesses the light-based logic gate, a photonic circuit, and, and considers photonic structures, data processing, to replace conventional hardware of the movement of electrons.

1. Photon advantage of light; advantage of optical communication and network

2. Fundamental advantage of photonics...

3. Optical data storage, photon-based optical memory on conventional system-based has the existing electronic memory.

4. Photons are also computing parallel and signal delay processing using photonic fast or slow data flow range from 100 to 1000 m/s
