

The background of the cover is a photograph of a serene Scottish landscape. In the foreground, a dark, silhouetted shoreline with a few trees is visible. A calm lake reflects the sky and the distant mountains. The mountains are hazy and blue-toned, suggesting a distance or atmospheric conditions. The sky is a clear, pale blue. The overall mood is peaceful and natural.

Planning Law Essentials Anne-Michelle Slater, 2014-03-17 Much of the new Scottish planning system legislated by the Planning etc Scotland act 2006 and various secondary legislations has now been implemented with a commitment to further reforms Planning Law Essentials explains the current state of planning law in Scotland as a whole with a focus on the recent reforms From national to local planning policy and from applications to appeals it is an excellent resource for Scots law students planners surveyors land managers environmental NGOs and community groups End of chapter summaries highlight the essential facts while the essential cases summaries show how the planning law has been enacted in practice *Restoring Layered Landscapes* Marion Hourdequin, David G. Havlick, 2016 Restoring Layered Landscapes brings together historians geographers philosophers and interdisciplinary scholars to explore ecological restoration in landscapes with complex

histories shaped by ongoing interactions between humans and nature For many decades ecological restoration particularly in the United States focused on returning degraded sites to conditions that prevailed prior to human influence This model has been broadened in recent decades and restoration now increasingly focuses on the recovery of ecological functions and processes rather than on returning a site to a specific historical state Nevertheless neither the theory nor the practice of restoration has fully come to terms with the challenges of restoring layered landscapes where nature and culture shape one another in deep and ongoing relationships Former military and industrial sites provide paradigmatic examples of layered landscapes Many of these sites are not only characterized by natural ecosystems worth preserving and restoring but also embody significant political social and cultural histories This volume grapples with the challenges of restoring and interpreting such complex sites What should we aim to restore in such places How can restoration adequately take the legacies of human use into account Should traces of the past be left on the landscape and how can interpretive strategies be creatively employed to make visible the complex legacies of an open pit mine or chemical weapons manufacturing plant Restoration aims to create new value but not always without loss Restoration often disrupts existing ecosystems infrastructure and artifacts The chapters in this volume consider what restoration can tell us more generally about the relationship between continuity and change and how the past can and should inform our thinking about the future These insights in turn will help foster a more thoughtful approach to human environment relations in an era of unprecedented anthropogenic global environmental change
